## INSTRUCTIONS

This survey is a continuation of an ongoing periodic exercise with the latest previous survey carried out in 2012. Answers submitted at that time will be taken into consideration to see where changes have taken place.

This survey is intended to address **national data** and the perspective on **a national level about alcohol issues**. In some instances, space is provided to allow for comments related to sub-national/regional data. There is also the possibility to make comments on the last page of the questionnaire.

Questions about specific restrictions will be asked. As necessary, please provide further information about the situation or specific bans at the relevant question in the space provided under the question or on the last page of the questionnaire.

Because of interlinkages between alcohol and drugs, there are questions on both included in the surveillance section.

26. What are the strategies used to prevent **drink-driving** in your country? **Check (✓) all that apply.**

[Sobriety checkpoints means checkpoints or roadblocks established by the police on public roadways to control for drink-driving.

Random breath testing means that any driver can be stopped by the police at any time to test the breath for alcohol consumption.

Graduated licensing means once the initial eye and written tests are passed, a new driver gets a restricted licence. These restrictions mainly pertain to zero tolerance around alcohol and drug use and limit the time of day one can drive as well as the class of roads where one can drive. This process is designed to give new drivers time to practice and gain driving experience over time, and must be completed within five years.]
