South-Central

North

Red – sequenced Blue – High suspicion

Preventive measures

International restrictions

- Ban on non-citizen incoming travel
- Low risk country designation - eliminated
- High risk countries –
 - Travel forbidden. 5,000 NIS (1,600 US\$) fine for violation
 - 7 day isolation including electronic surveillance for all returning from high risk countries (including fully protected). PCR on days 0 + 7.
 - For unprotected - isolation at protected facility until first negative test result.
- Intermediate risk countries - 3 day isolation for all returning from (including fully protected). PCR on days 0 + 3.

Local restrictions

- Full 14 day isolation for Omicron confirmed cases (no shortening with tests)
- 7 day isolation with 2 tests for fully protected contacts of suspected Omicron.

Lab measures

- All positive PCR's screened by Seegen/Thermofisher
- Specific Omicron primer being developed locally.
