

WHO Chemical Risk Assessment Network Community of Trainers (CoT) Webinars on How to Design a Training in Chemical Risk Assessment

World Health
Organization

Department of Environment, Climate Change and Health

Aim

The aim of the webinar series is to support new trainers in designing trainings in chemical risk assessment and to share experience between new and more experienced trainers. Each webinar will focus on specific aspects of designing trainings and include presentations and interactive discussions in breakout rooms where participants apply the knowledge on their own planned training. After each webinar participants can continue to apply the knowledge from the webinar on their own planned training and receive feedback from other participants in the CoT Web Platform.

Who should attend

The webinars are suitable both for new trainers who will design their first training and for more experienced trainers who would like to further develop their training. The principles of training design are applicable for all types of trainings, from 1-day to 1-year long trainings; face-to-face and virtual web-based trainings; trainings covering any topic within the broad field of chemical risk assessment and trainings for different target groups.

Webinars

Webinar 1

Target audience, Learning outcomes, Resource needs

Nov 30, 2021, 2pm-4pm UTC+1/CET

The first webinar will discuss how to identify the target audience for your training, e.g. previous knowledge and experience, reasons for attending the training, time or resource constraints for attending the training. We will also discuss how to identify and articulate learning outcomes for the training, i.e. what the participants should be able to do after the training and resources needed for designing and providing training.

Webinar 2

Content, Teaching and learning activities and material

Feb 1, 2022, 2pm-4pm UTC+1/CET

The second webinar will discuss how to identify the content that will be covered in the training and select suitable teaching and learning activities that will be used, e.g. lectures, assignments, group activities, practical tasks. We will also discuss different forms of teaching and learning material, e.g. web-based material and case studies.

Webinar 3

Format for training, Assessment and Participant feedback

March 29, 2022, 2pm-4pm UTC+1/CET

The third webinar will discuss how to choose a suitable format for the training, e.g. length of training; face-to-face or virtual web-based training. We will also discuss how to assess the participants' learning, e.g. peer assessment, feedback, exams. Finally we will discuss how to collect participants' evaluation of training and use it for developing the training further.

Format for webinars

Each webinar will have the following structure:

- Welcome and introduction
- Presentation covering the webinar topics
- Discussion in break-out rooms where participants apply the information from the presentation on their own training
- Reporting back from break-out rooms
- Conclusions and next steps

The webinars will be in the Zoom platform. Break out rooms will report back from their discussions using the Padlet or Mentimeter tool.

REGISTRATION
