This 90 minute webinar training course will (i) provide examples of incidents where rapid public health risk assessments are required for rapid decision making by risk managers and authorities involved in incident response; (ii) explain why this approach is more appropriate than traditional risk assessments; (iii) provide an overview of the rapid public health risk assessment process and examples of tools available to undertake these assessments; and (iv) will include an interactive session.

Rapid public health risk assessment to inform chemical incident response action – an introductory training session

Wednesday, 14 October 2020

WHO Chemical Risk Assessment Network institutions, public health professionals and risk assessors with an interest in chemical incident response are invited to join us for a webinar on 14 October, part of an ongoing series of Network webinars throughout 2020. This online event will take place 14:00-15:30 (UTC+2/CEST).
