

List of member organizations of the WHO Civil Society Task Force on Antimicrobial Resistance (2025-)

Listed according to the primary location, disaggregated by WHO regions

WHO Africa Region		
African Comprehensive HIV/AIDS Partnership (ACHAP)	ACHAP is a Botswana indigenous not for profit organisation founded in 2000 for Social and Health Impact. ACHAP uses Implementation Science to build capacity bottom up from community, district and national public health and social delivery systems for increased access to services and programs. The organisation's scope transitioned from HIV/AIDS to broader public health concentrating in community systems strengthening in a view to address determinants of health that impact on HIV/AIDS. The organization has extensive experience working with Government, NGOs and communities including the private to support improved health and social outcomes by embedding monitoring, evaluation and quality improvement strategies in implementation of its projects to ensure evidence-based planning and result based performance monitoring using low cost high impact strategies. ACHAP is currently implementing grants from PEPFAR, Global Fund, Africa CDC, National Institutes of Health (NIH), the Government of Botswana and other donors for implementation of HIV, TB, NCD and emergency response such as COVID-19 response.	www.achap.org
AMR Now	AMR Now is a dynamic, youth-led not-for-profit initiative uniting professionals from diverse fields to combat the escalating threat of antimicrobial resistance (AMR). We believe that tackling this global crisis requires a One Health approach, recognizing the interconnectedness of human, animal, and environmental health. Our mission is to build an AMR-aware community where every individual understands their role in this fight. We achieve this through AMR education, public awareness campaigns, and by promoting the prudent use of antimicrobials. We strive for a future where indiscriminate antimicrobial use is a thing of the past, and our collective responsibility ensures the preservation of modern medicine.	www.amrnow.org
Amref Health Africa Tanzania	Amref Health Africa Tanzania is a locally registered non-governmental organization established in 1987, part of the Africa-wide Amref Health Africa network operating since 1957. For over 35 years, the organization has led public health initiatives in Tanzania, collaborating with government ministries across Tanzania Mainland and Zanzibar through community-based approaches.	www.amref.org

Centre For Initiative and Development (CFID) Taraba	<p>The Centre for Initiative and Development (CFID) Taraba is a registered non-governmental organization dedicated to strengthening health systems, community development, and capacity building for underserved populations. Specializing in Antimicrobial Resistance (AMR), Antimicrobial Stewardship (AMS), and Infection Prevention and Control (IPC), CFID collaborates with stakeholders to implement AMS interventions across Nigeria. Its initiatives include training multidisciplinary healthcare workers, empowering schools and communities through education, conducting nationwide AMR campaigns, and publishing evidence to inform policy. CFID has supported 14 hospitals with AMS action plans, trained over 250 AMR peer educators, and reached more than 200,000 people with AMR messages. Through evidence-based strategies and partnerships, CFID advances rational antibiotic use and equitable access to essential health services while reducing the burden of AMR</p>	https://www.cfidtaraba.org/
Coalition for Health Promotion and Social Development (HEPS Uganda)	<p>"Coalition for Health Promotion and Social Development (HEPS-Uganda) is a registered national NGO with over 20 years of experience in health systems research, health accountability, and social development for marginalised communities. Our work focuses on AMR, HIV/AIDS, TB, malaria, reproductive health, essential medicines, and other essential health commodities across Uganda. HEPS-Uganda has a rich expertise in health policy analysis and advocacy and is currently representing CSOs on the Health Policy Advisory Committee at the Ministry of Health and participates in various TWGs like One Health TWG, the National AMR subcommittee, MCH, among others. Our expertise in simplifying scientific data for common understanding for the common person and has supported evidence use for decision making and policy advocacy. HEPS Uganda also has expertise in community empowerment using community-led models based on human rights and has a presence in 15 districts in Uganda.</p> <p>"</p>	https://www.heps.org.ug/
Consummate Health and Sanitation-CHS	<p>Consummate Health and Sanitation (CHS) is a registered nonprofit organization based in Liberia, dedicated to improving community health outcomes through education, advocacy, and service delivery. CHS works across critical health areas including Antimicrobial Resistance (AMR), Infection Prevention and Control (IPC), Sexual and Reproductive Health (SRH), Noncommunicable Diseases (NCDs), and Climate Action. Since its founding, CHS has championed AMR awareness and youth engagement, hosting Liberia's first National Youth AMR Conference in 2024 and the Annual AMR Conference in 2025, bringing together diverse stakeholders for policy dialogue and</p>	https://www.facebook.com/share/15NDfARSU6/

capacity building. Through innovative community-driven approaches, strategic partnerships, and policy advocacy, CHS empowers communities to adopt healthier practices while contributing to national and global efforts to mitigate AMR and strengthen health systems.

Dr Ameyo Stella Adadevoh (DRASA) Health Trust	Dr Ameyo Stella Adadevoh (DRASA) Health Trust is a public health nonprofit founded in memory of Nigeria's Ebola heroine whose decisive stand and sacrifice in the face of the deadly Ebola virus saved millions. Our work combines grassroots participation with government partnerships to drive comprehensive, lasting change. We are developing a network of Health Champions who are catalysts of change while simultaneously working with federal, state and local institutions to shape public policy and institutionalize disease prevention. We believe that healthier communities begin with informed people, accountable institutions, and strong systems and this is reflected across our four program areas: Antimicrobial Resistance (AMR), Community Health and Hygiene, Health Security, and Infection Prevention and Control (IPC). DRASA supports integrated interventions to reduce AMR across Nigeria's One Health sectors leading interventions from mainstreaming AMR education in secondary schools to developing strategies for AMR surveillance data sharing to building awareness and changing behavior of key groups.	www.drasatrust.org
Ducit Blue Foundation	Ducit Blue Foundation is the non-governmental (NGO) arm of Ducit Blue Solutions, a healthcare consultancy company with the vision to be a leading solutions provider in the healthcare industry, making quality service delivery and patient safety accessible to all across the public and private sectors, using an embedded approach. We develop capacity empowerment programs across Africa and our expertise cuts across patient safety solutions, strategies for combating antimicrobial resistance, research and development, Data-Driven Health Solutions, youth productivity, policy development , advocacy, and demand-based training.	https://foundation.ducitblue.com
Ecumenical Pharmaceutical Network	Ecumenical Pharmaceutical Network (EPN) , a faith-based, not-for-profit organization is dedicated to ensuring access to quality pharmaceutical services and advancing global health goals. As a civil society actor, it unites 149 member health associations, drug supply organizations, institutions, and individuals committed to just and compassionate healthcare delivery, mainly supporting church health systems across 38 African countries. The network promotes partnership, knowledge sharing, and best practices to strengthen pharmacy services and access to affordable, quality medicines. Leveraging church infrastructure, it reaches over 300 million people, builds	www.epnetwork.org/

healthcare provider capacity, engages in policy advocacy, and raises awareness on antimicrobial resistance prevention and control in vulnerable communities. EPN's strengths include convening diverse stakeholders, maintaining strong financial and policy systems, and offering a trusted platform for learning and collaboration. Its civil society role uniquely amplifies community voices, influences policy, and fosters collective action to improve equitable healthcare access worldwide.

Generational Stewards for Antimicrobials	The Generational Stewards for Antimicrobials (GSA) is a youth-led organisation founded in 2021 and registered under the Zimbabwe Youth Council. We are dedicated to fostering education, innovation, and advocacy that enhances understanding of the health, agricultural, environmental, socioeconomic, and developmental impacts of Antimicrobial Resistance (AMR) in high-risk communities. As a pioneering member of the African Youth AMR Alliance Task Force (AYARA-TF) and the Global AMR Multi-Stakeholder Partnership Platform, we are well-positioned to amplify the voices of young people in the global AMR discourse. By engaging young people in these critical conversations, we aim to foster awareness and drive effective solutions to combat AMR.	https://www.gsaglobal.org.zw/
Global Emerging Pathogens Treatment Consortium	The Global Emerging Pathogens Treatment Consortium (GET) is an African-led, non-profit organization established in 2014 in response to the West African Ebola outbreak. It focuses on strengthening Africa's capacity to prevent, detect, and respond to emerging and re-emerging infectious diseases, biological threats, and environmental health challenges. Through a One Health approach, GET promotes biosecurity, research, policy development, and community engagement. Its initiatives include training programs, school outreach, biosecurity fellowships, and strategic partnerships with governments and health institutions to build resilient health systems and support effective outbreak preparedness and response across the continent.	www.getafrica.org
Health Improvement Project Zanzibar (HIPZ)	Since 2006, HIPZ has been at the forefront of healthcare transformation in Zanzibar, working towards a vision where everyone has access to quality healthcare. In close partnership with the Zanzibar Ministry of Health, we strengthen the health system guided by our core values: patient-centred care, local leadership, and equity. HIPZ is an active member of the Zanzibar Multisectoral Coordinating Committee, supporting the implementation of the National Action Plan on AMR. Together with partners, we established and operate Zanzibar's AMR surveillance system in human health and are advancing antimicrobial stewardship across health facilities. Our AMR initiatives are	https://hipz.org.uk

embedded in implementation research, enabling us to share insights with both local and global stakeholders.

Helix Biogen Institute	Helix Biogen Institute is a private biomedical research institute based in Ogbomoso, Nigeria, dedicated to advancing scientific solutions to Africa's pressing health challenges. Our work focuses on infectious diseases, antimicrobial resistance (AMR), vaccine design, and development of point-of-care diagnostic kits. Through cutting-edge bioinformatics, genomics, and molecular biology research, we contribute to understanding the mechanisms of AMR and support evidence-based strategies for surveillance and intervention. Helix Biogen Institute also engages in capacity building, training scientists and health professionals across Africa in modern biomedical and computational tools. With a strong commitment to the One Health approach, we bridge human, animal, and environmental health research, aligning closely with the WHO AMR agenda. As part of the WHO Civil Society Task Force on AMR, Helix Biogen Institute seeks to amplify African perspectives, foster collaborations, and accelerate innovative solutions to mitigate AMR at national, regional, and global levels.	www.helixbiogeninstitute.org
Hervitan Foundation	HERVITAN foundation is a non-profit organisation committed for charity services and community development initiatives. It recognises the diversity of Tanzanian communities in terms of economic status and access to socio services; and the existence of different forms of social disadvantages including illiteracy, poor health, food insecurity, water scarcity, Climate Change related risks, environmental destruction, Gender Based Violence, limitation of responsive partnerships and the like that force the population into extreme poverty. Among others, our foundation plays a vital role in addressing complex one health challenges including Antimicrobial Resistance (AMR) by raising public awareness, advocating for policy changes, building local capacity, and fostering community-based solutions in National Action Plans. We bridge gaps between communities and policymakers; facilitate dialogue, sharing best practices, and Risk Communication and Community Engagements; and promote equitable access to Infection Prevention and Control (IPC) interventions, thereby contributing to a more efficient and effective community-centered responses to global challenges.	https://www.hervitan.org
LVCT HEALTH	"LVCT Health is a Kenyan NGO dedicated to improving health and well-being among vulnerable and marginalised communities. We design and deliver programmes in HIV prevention and care, sexual and reproductive health, mental health, gender-based violence, and health systems strengthening. Our work is guided by a strong	https://lvcthealth.org/

commitment to gender and equity, ensuring that women, young people, and disadvantaged groups have fair access to health services and solutions. We are recognised for our community engagement and behaviour change approaches, addressing harmful norms and building trust with those most affected. Central to our approach is the Hatua model – linking research, policy, and practice. Through this model, we generate local evidence, test innovative solutions, and contribute to policies and programmes at national and international levels. This way, LVCT Health connects community experience with system-level change, positioning us as a trusted leader in advancing equitable and sustainable health solutions in Kenya and beyond."

One Health and Development Initiative	"One Health and Development Initiative (OHDl) is a global nonprofit organization advancing One Health and sustainable development by addressing interconnected challenges across human, animal, plant, and ecosystem health. A core area of our work is antimicrobial resistance (AMR), where we work to strengthen AMR prevention and mitigation, and antimicrobial stewardship in Nigeria and other low- and middle-income countries (LMICs). Our track record includes ongoing collaborative research to develop the AMR Sustainable Impact Resource Guide, a practical framework for designing lasting AMR interventions in LMICs. We also lead the African Youth for AMR Communication Project, which empowers students and young professionals to become antimicrobial stewards through the award-winning Stop Superbugs Squad initiative. At the national level, OHDl has implemented AMR knowledge, attitudes, and practices (KAP) research, contributed to Nigeria's AMR situational analysis, and supported community adoption of the National Action Plan on AMR (2017–2022). "	https://onehealthdev.org/
One Health in Action Initiative	"One Health in Action Initiative (OHIA) is a youth-led public service organization advancing health equity at the human–animal–environment interface, with a strong focus on combating antimicrobial resistance (AMR). Guided by the One Health approach, OHIA drives innovative education, advocacy, and community-based solutions that prevent AMR while strengthening zoonotic disease prevention. OHIA's flagship program, the Prioritizing Antimicrobial Stewardship (PAS) Program, builds knowledge and skills among health professionals, and communities to promote responsible use of antimicrobials. Through PAS, OHIA has trained several early career professionals and reached different target groups through campaigns, workshops, and the PAS Podcast. To complement this, OHIA launched the Nigerians Keeping Antibiotics Working (NKAU) Initiative, a pioneering effort to engage local communities in sustainable AMR prevention practices. With a vision of a world where One Health	https://ohiainitiative.wordpress.com/

strategies eliminate AMR for sustainable health, OHIA is shaping Africa's AMR response and inspiring youth-led global action.

One Health Innovative Solutions (OHIS)	One Health Innovative Solutions (OHIS) is a Cameroon-based non-profit organization dedicated to developing Innovative solutions for complex health challenges. The OHIS vision is to promote Innovative and sustainable solutions to both local and global challenges using the one health approach. Its mission is to develop evidence-based solutions to address sustainable development goals at the human-animal-environment interface, by fostering collaboration, strengthening local capacities, and advancing the One Health approach to improve community well-being in Africa. OHIS builds capacity through tailored trainings for laboratories, clinicians, veterinarians, public health officers and communities, facilitates multi-sector data-use planning and conducts burden-of-disease and economic analyses to inform investment decisions. OHIS combines scientific rigor and practical field support to deliver timely, decision-ready AMR/AMU/AMC evidence.	https://ohis.cm
One Health Society Tanzania	One Health Society (OHS) is a registered Tanzanian NGO established in 2019, operating under the advisory of the Prime Minister's Office–One Health Section. OHS leads national efforts to combat Antimicrobial Resistance (AMR) through advocacy, training, research, and community engagement. It played a key role in developing Tanzania's second (2023-2028) National Action Plan on AMR and the One Health Strategic Plan (2022-2027). OHS founded the Tanzania Parliamentarians Alliance for AMR to strengthen evidence-based policymaking and build political momentum and advancing the One Health approach. For more information visit www.ohs-health.org	https://www.ohs-health.org/
Pan-African Treatment Access Movement	The Pan-African Treatment Access Movement (PATAM) was formed in 2002 as a broad civil society advocacy front to advocate for universal access to antiretroviral therapy. This development catalysed the formation of a number of national level treatment advocacy organisations. PATAM has been involved in a number of initiatives besides HIV and AIDS treatment advocacy, and these include TB, medical diagnostics, Covid-19, medicines regulation, intellectual property rights and access to medicines and disability rights. In 2015, PATAM started the Zimbabwe antimicrobial resistance program with technical support from a number of partners, and the organisation was involved in a number of capacities, including being a member of the National Core Group, chairperson of the Education & Awareness technical working group and head of the national AMR secretariat. At the broader level, the organisation has worked on	https://patam.org/

raising awareness on AMR among civil society through training workshops, online webinars and articles.

Pharmacists Against Drug Abuse (PADA)	"Pharmacists Against Drug Abuse (PADA) is a group of pharmacists and their partners who provide accurate information to the public and other healthcare professionals about drug misuse, drug abuse, and substance abuse. Their goal is to promote rational use of medicines, prevent dependence, and support rehabilitation, thereby safeguarding public health. PADA is committed to supporting the global action of preventing the rising threat of Antimicrobial resistance (AMR). PADA was initiated by the Pharmaceutical Society of Zimbabwe more than two decades ago. PADA carries out a range of drug abuse and drug misuse campaigns, community workshops, and school outreach programs, to raise awareness about substance misuse. PADA hosts continuous professional development workshops to educate pharmacists, physicians and other health professionals. PADA has also been involved in; information dissemination for decision making; participating in public substance abuse education & prevention programs and; conducting research on drug misuse, substance abuse and addiction."	https://www.facebook.com/share/1CG83ZJDdP/?mibextid=wwXlfr
ReAct Africa	ReAct Africa is a regional hub of the global ReAct network, uniting experts and stakeholders across sectors to combat antimicrobial resistance (AMR). We support the development and implementation of National Action Plans through technical assistance and strategic coordination. Embracing a One Health approach, ReAct Africa drives awareness and advocacy efforts across human health, veterinary, agricultural, and environmental sectors, with a focus on low- and middle-income countries and especially, for Africa. Our mission is to promote sustainable, context-specific solutions that ensure equitable access to effective antibiotics and protect the right to health for all. Working collaboratively with national, regional, and global partners, ReAct Africa champions integrated, multisectoral action to address the growing threat of antibiotic resistance.	https://www.reactgroup.org/africa/
Roll Back Antimicrobial Resistance Initiative(RBA Initiative)	The Roll Back Antimicrobial Resistance Initiative (RBA Initiative) is an NGO dedicated to combating AMR, headquartered in Dodoma, Tanzania. With an international reach, it has emerged as a pioneering force in the field, setting a precedent in Africa and globally for its specialised focus on AMR mitigation and advocacy. Guided by behavioural science, it promotes awareness and behavioural change, conducts research, supports infection prevention and WASH, and advocates at national, regional, and global levels across human health, agriculture, and the environment.	https://rbainitiative.org/

Currently, the organisation collaboratively supports the implementation of AMR projects in Tanzania, Ghana, The Gambia, Uganda, and the United Kingdom. Its work on community engagement in AMR has been recognized internationally, including at the UN High-Level Dialogue on AMR. The RBA Initiative was the first local non-governmental organisation dedicated exclusively to combating AMR to be founded in an African country.

Shepherd For Health Environment Advocacy and Development (SHEAD) Centre	"Shepherd for Health Environment Advocacy and Development (SHEAD) Centre Incorporation is a 501(c)(3) not-for-profit organization registered in the USA and Nigeria as SHEAD Centre. We are dedicated to bridging health disparities by providing accessible healthcare services, health education, and support programs tailored to the unique needs of the general population. SHEAD Centre Inc. empower change, transform lives and inspire hope. Our mission is to create and support interventions that directly improve the health and wellbeing of the society. We envision a safe, healthy, and supportive environment for a sustainable society. We promote accountability in areas such as antimicrobial stewardship, infection prevention and WASH infrastructure, More so, SHEAD Centre promotes one health collaboration by linking antimicrobial resistance work with environmental sanitation, safe water and food safety interventions. SHEAD Centre remain committed to contribute evidence from community level projects to shape global antimicrobial priorities."	www.sheadng.org
Sim Impacting Lives Foundation	Sim Impacting Lives Foundation is a Nigerian non-profit, non-governmental organization committed to advancing public health and restoring dignity among vulnerable populations. Guided by a vision of healthier and more resilient communities, our mission is to save lives, reduce inequities, and empower people through evidence-based and people-centered interventions. SILF focuses on public health, nutrition, humanitarian response, and mental health and psychosocial support. Our health programs address HIV and AIDS, tuberculosis, malaria, hepatitis, neglected tropical diseases, and antimicrobial resistance. Beyond service delivery, we engage in advocacy to strengthen health systems, promote responsible medicine use, expand treatment access, and influence policies that protect communities from emerging threats. Nutrition initiatives confront malnutrition and food insecurity, while humanitarian programs deliver urgent and sustained relief to families in crisis. Our mental health interventions build resilience and hope. Through strategic partnerships, SILF amplifies community voices and advances sustainable, equitable health solutions.	www.simimpactinglives.org

Tanzania Health Awake	Tanzania Health Awake (THA) is a youth-led organization promoting good health and well-being for all in Tanzania through advocacy, research, training, and creative partnerships. It is dedicated to advancing the United Nations Sustainable Development Goals. Grounded in the One Health approach, it recognizes the vital connection between human, animal, and ecological health in addressing complex public health threats. THA prioritizes combating antimicrobial resistance, zoonotic diseases, climate change, neglected tropical diseases, and mental health challenges. Through integrated risk communication, community engagement, and cross-sector strategies, it strengthens health systems, promotes sustainable practices, and expands access to quality care for vulnerable populations. With consistent partnerships, community empowerment, and innovation, Tanzania Health Awake creates lasting and scalable health solutions. Our vision is to build a healthier and more resilient Tanzania that contributes to global health security and sustainable development.	https://tzha.or.tz/
Tanzania Youth Health and Development Organization-TYHDO	Tanzania Youth Health and Development Organization (TYHDO) is a youth-led Non-profit organization dedicated to promoting public health through youth-driven Advocacy, research, and community engagement. At Tanzania Youth Health and Development Organization, we believe Youth can lead the advocacy in the field of health when equipped with skills, knowledge and space to do so. We stand proudly to empower youth with skills and knowledge to lead Public health advocacy and offer a space for youth to lead the advancement of the health sector and our society at large.	www.tyhdo.or.tz
Zihi Institute	'Zihi' is a Swahili word that means 'resilience'. We are a research and civil society organization that aims to create and enable infectious disease resilient and healthy communities through inclusive evidence generation, dissemination, and interventions. Through our Asset-based, Needs-Responsive (ABNR) model, we support communities in co-designing and co-implementing tailored and scalable interventions against infectious diseases and antimicrobial resistance (AMR) based on their respective capabilities, pre-existing knowledge & skills. We strive to promote equitable narratives, deconstruct hierarchies, and power imbalances in global health research to address the ingrained systemic barriers to global health through inclusive participation, research, knowledge sharing and advocacy.	www.zihiinstitute.org

WHO Eastern Mediterranean Region

Association for Social Development	Association for Social Development (ASD) is a registered not-for-profit civil society organization in Pakistan. Since 1995, we have been working in collaboration with national disease control programmes and (inter)national teaching and research institutions. Our work focuses on developing and evaluating potentially scalable integrated healthcare delivery models with meaningful engagement of respective communities. The scope of our work includes multiple communicable (TB/DR-TB, malaria, hepatitis), noncommunicable (diabetes and diabetic foot, asthma/COPD, mental health, clubfoot), and maternal and child health (safe birthing, early child development) conditions. Our international recognition includes the awarding of “Karel Styblo Prize” (2010), and “Princess Chichibu Memorial TB Global Award” (2018), as well as serving on the WHO Civil Society Task Force (TB) and multiple guidelines development groups.	https://asd.com.pk/
Ebla Private University	Ebla Private University is a Syrian academic institution dedicated to revitalizing its educational mission following years of conflict. Despite limited infrastructure and damaged laboratories, Ebla focuses on empowering pharmacy graduates with knowledge and advocacy skills to combat AMR. Through curriculum reform, student engagement, and community outreach, the university promotes responsible antibiotic use and public awareness. Ebla believes that pharmacists are frontline educators in the fight against AMR, especially in vulnerable and underserved communities. By joining the WHO Civil Society Task Force, Ebla seeks to amplify its voice, share its experience, and contribute meaningfully to global efforts for equitable health and sustainable AMR solutions	https://www.epu.edu u.sy
Egyptian pharmaceutical students' federation of NUB(EPSF-NUB)		https://epsf- eg.com/
Emirates Society of Clinical Microbiology	"The Emirates Society of Clinical Microbiology (ESCM), under the Emirates Medical Association, is the national professional body dedicated to advancing clinical microbiology and infectious diseases in the UAE. ESCM serves as a platform for collaboration, knowledge exchange, and professional development, uniting microbiologists, infectious disease specialists, laboratory professionals, and scientists. The Society promotes excellence in clinical practice, education, and research, with emphasis on antimicrobial resistance, diagnostic innovation, infection	https://escm.ae/

prevention and control, and emerging pathogens. Through scientific meetings, training workshops, and partnerships with national and international organizations, ESCM builds capacity and contributes to evidence-based policies that strengthen the UAE's preparedness for infectious disease challenges. By aligning professionals under a shared vision, ESCM plays a vital role in advancing clinical microbiology and reinforcing the UAE's leadership in global health priorities."

Jamhuriya Research Center	Jamhuriya University of Science and Technology (JUST) is a private, non-profit institution in Somalia, deeply committed to advancing research, development, and addressing critical health problems within our community. As a testament to this commitment, JUST has established the AMR Center for Somalia, a dedicated hub designed to significantly contribute to the fight against Antimicrobial Resistance. Our initiative extends to establishing AMR Genomics capabilities within this center, leveraging genomics and sequencing technologies to gain a deeper understanding of AMR patterns in Somalia and develop more effective, data-driven interventions. We actively seek national and international collaborations and partnerships to strengthen our efforts. Together, we are resolute in our mission to combat AMR, striving for a healthier future for Somalia and the wider region.	www.just.edu.so
One Health Alliance Jordan	"One Health Alliance Jordan (OHAJ) is a youth-driven, community-focused initiative based in Amman, Jordan. It promotes the One Health concept, which emphasizes the interconnectedness of human, animal, and environmental health. The alliance organizes public lectures, workshops, and awareness campaigns on issues like antimicrobial resistance (AMR), zoonotic diseases, food safety, animal welfare, and climate change. Activities include both in-person and online events, engaging students, graduates, and the wider community. Led by Arabian One Health Experts, OHAJ works to build public awareness and collaboration across sectors, aligning with global One Health strategies to improve health outcomes and sustainability in Jordan and the region."	https://linktr.ee/onehealthalliancejo
Pak One Health Alliance Islamabad Pakistan	Founded in October 2014, Pak One Health Alliance (POHA) is a public health research and development organization, working in Pakistan for prevention and control of emerging infectious disease deploying 'One Health Approach'. Primarily, its focus is to curtail illness/disease spread either through human-animal, human-food, human-vector or human - human-ecosystem interface. POHA draws its strength from its long professional partnerships with multiple governmental, national and international organizations. It is guided by a Program Governing Body derived from diverse one	www.pakonehealth.org

health disciplines. POHA has distinct agreements of technical collaboration with the leading federal and provincial government departments/international organizations. It has approval from Government of Pakistan Economics Affairs Division (EAD) to undertake foreign funded projects. Currently, POHA is working with Ending Pandemics under a Rockefeller Foundation Grant for implementation of a two years project on 'One Health - Event Based Surveillance (2021-2023). In the recent past, POHA got support from organizations like Fleming Fund, Ending Pandemics, UNDP and World Health Organization on a number of One Health initiatives including Health System Governness, AMR Surveillance, Pakistan's COVID-19 Readiness and Resilience Table Top Exercise. POHA is currently working with local university and Ministry fo Health for the development of Model One Health Districts including competencies in AMR.

The Egyptian Society for Infection Control (ESIC, APIC/Egypt Chapter)	The Egyptian Society for Infection Control (ESIC), established officially in 1996 under the Ministry of Social Solidarity, is the oldest and largest non-governmental organization dedicated to infection prevention and control (IPC) in Egypt and the Arab region. A national pioneer, ESIC led the development of Egypt's first National IPC Guidelines in 2002 and continues to strengthen their application via education, training and capacity-building. Through its postgraduate certificate and diploma programs—developed with the American University in Cairo and the Arab Institute for Continuing Professional Development—ESIC have graduated over 1,600 IPC professionals, creating national expertise essential for combating antimicrobial resistance (AMR). As co-founder of IFIC, a member of ICAN, and the first APIC international chapter outside the U.S., ESIC promotes strong national and international collaborations. Its mission is to advance IPC, empower healthcare workers, and safeguard patient safety, while contributing significantly to the global fight against AMR.	https://esicegy.org
Youth and Development Consultancy Institute Etijah	Youth and Development Consultancy Institute Etijah, established in 2006 in Egypt, is a leading non-governmental organization committed to empowering youth and communities nationwide. Etijah operates through six flagship programs: Youth, Health, and Women Empowerment, Education, Culture and Scholarships, Economic Empowerment and Livelihoods, Sports, Humanitarian Program and Climate Change and Environment. Across these areas, Etijah promotes youth leadership, inclusive education, and access to decent employment, while addressing urgent social and health priorities. Its health work focuses on advancing women's rights and well-being by tackling gender-based violence, harmful practices, and barriers to sexual and reproductive health, with a strong emphasis on prevention, protection, and community	https://etijah.org/

awareness. By combining education, livelihoods, and health with cultural and civic engagement, Etijah has reached millions across Egypt, creating safe spaces, promoting social cohesion, and fostering equitable opportunities for all.

WHO European Region		
AMR Patient Alliance	The AMR Patient Alliance was created in 2021 with a vision of a world where human-induced antimicrobial resistance is eliminated. Our mission is to work on patient empowerment, literacy and engagement for preserving the effectiveness of antibiotics, so that they can be accessible and effective for as long as possible for the future generations.	https://www.amrpatientalliance.org
British Society for Antimicrobial Chemotherapy (BSAC)	Founded in 1971, the British Society for Antimicrobial Chemotherapy (BSAC) is one of the world's leading communities of infection experts, bringing together scientists, healthcare professionals, policymakers, and industry leaders. With thousands of members across the world, the Society is dedicated to educating and training the global workforce, promoting antimicrobial stewardship in the face of rising drug-resistant infections.	https://bsac.org.uk/
Cittadinanzattiva APS	"Cittadinanzattiva APS (www.cittadinanzattiva.it) is a civil society organization founded in Italy in 1978, which promotes citizens' activism for the protection of rights, the care of common goods, the support for people in conditions of weakness in Italy and - thanks its EU branch "ACN-Active Citizenship Network" (www.activecitizenship.net) – also abroad. Its headquarters is located in Rome (Italy), while its Representative office to the EU Institutions is located in Bruxelles (Belgium). Cittadinanzattiva, also officially recognized in Italy as a consumer organization, is independent from any political affiliation, trade unions, private companies, and public institutions. As PAG-Patient Advocacy Group, it is deep involved in health related issues, as testified by its main flagship initiatives: European Charter of Patients' Rights; European Patients' Rights Day; MEPs Interest Group "European Patients' Rights and Cross-border Healthcare" at the EU Parliament. Here its long-lasting commitment on Healthcare-Associated Infections (HAIs) and	https://www.cittadinanzattiva.it/
Commonwealth Pharmacists Association (CPA)	The Commonwealth Pharmacists Association (CPA) is a charity and an accredited organisation of the Commonwealth that works to advance equitable access to safe and effective medicines and pharmacy services for a healthier world. We achieve this through empowering pharmacists to improve the health and well being of the communities they serve: building workforce capability, transforming pharmaceutical policy into practice and working with governments to translate advocacy into tangible	https://commonwealthpharmacy.org

actions and solutions. We have many programmes of work, delivered in partnership with our members (national pharmacy associations) and in-country partners, including several long standing award-winning antimicrobial resistance initiatives, such as the highly successful Commonwealth Partnerships for Antimicrobial Resistance (CwPAMS) programme that we have run in partnership with health institutions across eight African nations and the UK. We are in special relations with WHO and have an active collaboration plan across several areas, including around AMR.

European Network of Medical Residents in Public Health (EuroNet MRPH)	EuroNet MRPH is a network of Public Health residents across Europe. It fosters collaboration through professional networking, information sharing on educational programs, and joint activities. The association advocates for its core values and encourages national associations to participate. It supports scientific collaboration leading to publications, promotes professional skill development, and organizes meetings, conferences, and workshops. EuroNet facilitates internships in member countries and strengthens the role of Public Health professionals. While non-political, it supports civic engagement and firmly opposes discrimination or hate speech based on gender, ethnicity, religion, or sexual orientation, promoting inclusion and equity throughout its initiatives.	https://euronetmrph.org/
European Patients' Forum	The European Patients' Forum (EPF) is an independent non-profit, non-governmental umbrella organisation of patient organisations across Europe and across disease areas. Our 82 members include disease-specific patient groups, active at EU level and national coalitions of patients.	https://www.eu-patient.eu/
European Public Health Alliance	The European Public Health Alliance (EPHA) is advocating for better health for all, with 40+ members spanning across 20 countries. EPHA is a dynamic member-led organisation, made up of public health civil society, patient groups, health professionals, and disease groups working together to improve health and strengthen the voice of public health in Europe. EPHA is active in all policy areas that affect health, either directly via health policies, or across areas that have an impact on health, including those impacting the social, economic, environmental, political and commercial determinants of health.	http://epha.org
Health Care Without Harm Europe	Health Care Without Harm (HCWH) Europe exists to create a sustainable healthcare sector that helps people to live more healthily on a healthier planet. We are a network of thousands of hospitals, healthcare leaders and healthcare professionals, with members across Europe and partners across the globe. From individuals championing sustainability in their workplaces to large hospitals pushing for sustainable practices,	https://europe.noharm.org/

we stand side-by-side transforming how our healthcare systems work. HCWH Europe has a dedicated programme that works to reduce the healthcare sector's contribution to AMR by addressing pharmaceutical pollution and promoting responsible antimicrobial use. We develop guidelines and training to support healthcare professionals and facilities in reducing unnecessary antimicrobial prescribing, and we issue evidence-based recommendations to policymakers across Europe. HCWH Europe co-chairs the European Parliament Interest Group on AMR and is an appointed member of various international AMR networks, such as the One Health Network (European Commission) or the Multistakeholder Partnership Platform (WOAH, UNEP, WHO and FAO).

Health Diplomacy Alliance	Health Diplomacy Alliance was born from a pressing need to harness the finesse of diplomacy in catalyzing the intricate complexities of geopolitics and foreign affairs that shape health. The alliance started in 2020, a time of unprecedented challenges, when its founder and a group of experts converged, driven by a shared mission: to elevate health diplomacy for tackling the world's most critical health challenges. The pre-incubation phase sowed the seed of an Alliance that would grow into something promising and remarkable. By January 2024, we officially established ourselves in Geneva, Switzerland, as the first Alliance dedicated solely to health diplomacy, bringing our vision to life. What began as a coalition of dedicated professionals is fast evolving into a dynamic and expanding collaboration network.	www.hdalliance.org
International Veterinary Students' Association (IVSA)	Founded in 1953, the International Veterinary Students' Association (IVSA) is a non-profit, student-run organization that unites more than 38,000 veterinary students across 80+ countries and 190 Member Organizations. Its mission is to benefit animals and people worldwide by empowering students to apply their knowledge, skills, and passion on a global scale. IVSA carries out this mission through international congresses, symposia, exchanges, and projects in areas such as animal welfare, One Health, veterinary education, soft skills, and student wellness. These initiatives not only enhance professional development but also promote cultural understanding and international collaboration. By creating opportunities that combine learning, leadership, and service, IVSA works toward raising the global standard of veterinary education. Ultimately, it shapes future veterinarians into professionals committed to improving the health and welfare of animals and communities worldwide.	https://www.ivsa.org/
Les amis d'Antibiocllic	We are a non-profit organisation based in France that promotes and disseminates Antibiocllic, a computerised decision support system aligned with guidelines for	https://antibiocllic.com/

antibiotic therapy in primary care. The system is independent of the pharmaceutical industry. Antibioclic has existed for nearly 15 years, providing guidance on antibiotic prescriptions for more than 30 common infectious diseases in primary care for both adults and children to more than 120,000 French users, including 50,000 general practitioners. The system is highly popular, with over 5 million requests per year. Its usage data is a valuable source of information for understanding the dynamics of community-acquired bacterial infections and the factors that influence antibiotic prescriptions in this context. We have established a partnership agreement with the French national health insurance system. Our roadmap involves expanding the user base and the system's functionalities, as well as rolling it out in other countries, including low- and middle-income ones.

NORCE Norwegian Research Centre	"NORCE Norwegian Research Centre is one of Norway's largest independent research institutes, with over 1,000 employees and a broad portfolio of more than 1,500 projects annually. NORCE conducts interdisciplinary research across health, climate, energy, environment, technology, and social sciences, aiming to deliver knowledge that supports sustainable development and innovation. The institute collaborates with academia, industry, and public sectors to address societal challenges through applied research and advanced technological solutions. A focus area at NORCE is antimicrobial resistance (AMR), recognized as one of the most pressing global health threats. Researchers at NORCE investigate the spread of antimicrobial-resistant bacteria and genes in various environments—including Arctic ecosystems—using molecular tools and metagenomics. This work contributes to the global "One Health" approach, which emphasizes the interconnectedness of human, animal, and environmental health in combating AMR."	https://www.norceresearch.no/en/
Prematurföreningen Mirakel	Prematurföreningen Mirakel is at the forefront of neonatal care advocacy, with a strong focus on combating antibiotic resistance. As part of European networks like ENIPAR, the AMR Patient Group and Stakeholder collaboration on antibiotic resistance at Ministry of Health and Social Affairs, Mirakel raises awareness about antimicrobial risks in NICUs and promotes safer care environments. Their innovative projects include campaigns for single-family rooms to reduce infection spread, tactile massage therapy for expectant mothers, donation of funeral dresses for babies and blood donation drives for premature infants. Mirakel also provides emotional support to families, ensuring no one faces the challenges of prematurity and child loss alone. Through global collaboration with organizations, they share knowledge, influence policy, and	www.prematurmirakel.se

elevate care standards across borders. Mirakel blends science, compassion, and advocacy to create lasting impact. Committed to being part of the solution—driving progress today and shaping a healthier future.

ReAct - Action on Antibiotic Resistance	ReAct Europe, hosted by Uppsala University, is one of the four nodes of ReAct – Action on Antibiotic Resistance, a global network with offices on four continents (Africa, Asia, South America, and Europe). The network drives action through advocacy towards policymakers and international organisations, supports the implementation of national action plans, and promotes antibiotic resistance mitigation through community engagement, grassroots projects, and research.	https://www.reactgroup.org/
Samenwerkende Gezondheidsfondsen	The Collaboration on Infectious Diseases (SIZ) is an initiative by the Netherlands Society for Internists-Infectiologists, the Netherlands Society for Medical Microbiology and the Collaborating Health Funds (SGF). Within the program Collaboration on Infectious Diseases (SIZ) our mission is to reduce the number of people suffering from or dying from infectious diseases and antimicrobial resistance (AMR), and minimize the personal and societal impact of these issues. To achieve this, we strive to make health care as appropriate as possible. We do this by encouraging collaboration between professionals, patients and policymakers in the fields of prevention, diagnostics, treatment, education and research,	www.gezondheidsfondsen.nl
Society for International Development (SID)	<p>The Society for International Development (SID) is a global network founded in 1957, dedicated to promoting socio-economic justice and democratic participation. Strengthening collective knowledge and action towards people and planet-centered development, SID aims to steer systemic policy change for equity and sustainability through cohesive and inspiring initiatives.</p> <p>SID's programmatic priorities – food systems, global public health, finance, climate, future & foresights - spring from its longstanding engagement in tackling structural inequalities and is based on these key pillars:</p> <ul style="list-style-type: none"> • Human rights as the cornerstone of democratic governance and normative guidance across all levels; • Multidimensional inequalities as the diagnostic, analytical and normative framework to assess development challenges and guide policies; • Socio-economic transformation at micro, meso and macro level as the strategy to promote justice; • Democratization of global economic governance as the stepping-stone for the 	https://www.sidint.org/

removal of the structural barriers to socio-economic transformation within existing economic, financial, climate, trade, food and health frameworks.

Talk AB[M]R	TalkAB[M]R is an action-orientated Think and Do Tank, using evidence-based research/data to inform policy and drive social and behaviour change(SBC) in the AMR One-Health sphere across Africa and beyond. Talk uses an AMR Awareness 2 Action agenda to engage, empower, and mobilize Africa's diversity - from the grassroots to national, regional, and global levels - from children, youth, women, the disabled, marginalized, vulnerable communities to health professionals, leaders, policymakers, global icons - to act to comprehensively and sustainably address ABR/AMR using a One Health Approach	http://talkabr.org
World Federation of Public Health Associations	The World Federation of Public Health Associations (WFPHA) is the only professional society dedicated to advancing global public health. Since 1967, we have united over 130 member organizations and 5 million public health professionals to address health inequities, promote evidence-based policies, and foster global partnerships. Learn more about our mission, history, and the people driving our work to create a healthier, more equitable world.	https://www.wfpha.org/
World Medical Association	The World Medical Association (WMA) is the international organisation representing over 10 million physicians globally. Through its national member associations, it promotes the highest possible standards of medical ethics, public health and patient safety. It is headquartered in Ferney-Voltaire in France and counts 116 National Member Associations. The WMA has engaged in the Global Antimicrobial Resistance Agenda since 2016.	www.wma.net
WHO Americas Region		
American Society for Microbiology	As one of the largest professional life science organizations in the world and a leader in scientific publishing, ASM is the home for microbial scientists to connect, learn, discover and prepare for the future. We connect more than 37,000 members and millions of experts around the globe, harnessing their science to serve humanity and solve the most pressing global and public health challenges.	www.asm.org
Brazilian Institute for Consumers Defense - Idec (Instituto Brasileiro de Defesa de Consumidores, in portuguese).	Idec is an independent, non-governmental, non-profit, non-partisan consumer association. Its mission is to promote education, awareness, participation, the defense of consumer rights, and ethics in consumer relations. Through legal action, research, advocacy, and communication strategies, Idec has different program areas, including the Health Program, which focuses on four thematic axes: healthcare, fairly priced medicines, digital health, and AMR.	www.idec.org.br

Henry Ford Health (HFH)	Henry Ford Health (HFH) is a Michigan non-profit corporation and is one of the nation's leading comprehensive, integrated health systems offering healthcare delivery, including acute, specialty, primary and preventive care services backed by excellence in research and education. HFH has strong international research and training programs in infectious disease and antimicrobial stewardship. These programs have included development and implementation of locally-salient antibiotic guidelines; diagnostic stewardship; identification of barriers and facilitators to introduction of stewardship programs; healthcare worker education of physicians, pharmacists, nurses, and midwives; and surveillance of antibiotic dispensing/prescribing practices and assessments of knowledge and perceptions of AMR and stewardship within health facilities, communities, and the agricultural and veterinarian sector. Our programs have been implemented in over 20 LMICs, resulting in the training of over 1,000 physicians, nurses, midwives, and pharmacists. We primarily operate through our research hubs located in Nepal (South Asia), Jordan (MENA) and Colombia (Latin America).	https://www.henryford.com/global-health-initiative
Innovation+Design Enabling Access (IDEA) Initiative	The Innovation+Design Enabling Access (IDEA) Initiative advances policy and research addressing antimicrobial resistance across One Health dimensions. It has served as Secretariat for the Antibiotic Resistance Coalition, an intersectoral alliance of civil society and the South Centre. The program has worked on AMR governance issues through its Director, who has served as Co-Convenor of the UN Interagency Coordination Group on AMR and contributed to the Antibiotic Working Group of the U.S. President's Council of Advisors on Science and Technology. More recently, the Initiative served as a co-lead author for UNEP's global spotlight report on environmental aspects of AMR, produced a series of FAO video case studies on making markets work to reduce antimicrobial use in food systems, and authored a South Centre paper proposing next steps for global AMR governance. The Initiative previously organized a global student design sprint, Innovate4Health, to inspire innovative approaches to tackling emerging infectious diseases.	https://www.ignitetheidea.org
International Student One Health Alliance - ISOHA	International Student One Health Alliance goal is to connect students across the world interested in the connections between animal health, human health, and environmental health. ISOHA serves as an umbrella for International, Regional and National student organizations, One Health Clubs, BSc, MSc and PhD students (18-35) and provides education and opportunities related to One Health, through partnerships and collaborative projects.	https://isohaonehealth.wordpress.com/

Patients for Patient Safety Canada	Patients for Patients Safety Canada (PFPSC) is a not-for-profit organization with a vision of Every Patient Safe! We are the collective voice of patients and families who experienced preventable healthcare harm, and the only patient-led Canadian organization dedicated solely to patient safety. Working with the World Health Organization's (WHO) Patients for Patient Safety Global Network (PFPS), we contribute to a universal understanding of patient safety goals. Our campaigns and webinars advocate for a safer healthcare culture, and support patients and families partnering with healthcare providers to promote patient safety and learning. Working in partnership with other national and international healthcare organizations over two decades, we successfully shaped hundreds of patient safety resources, practices, programs, and policies around mutual healing, incident disclosure and management, and the prevention of incidents such as infections and medication errors. Our innovative virtual HeART Gallery reaches the hearts and minds of many. See www.patients4safety.ca .	https://www.patients4safety.ca
Vennue foundation	Vennue is a US non-profit organization. Our mission is to change the course of human health through a unique strategy of pharmacy workforce development. By offering high-quality, standard-based training, Vennue is harnessing the remarkable untapped potential of pharmacists to act as change agents in their local communities.	https://www.vennue.org/
World Federation for Animals, Inc (WFA)	The World Federation for Animals (WFA) is a global federation of 70+ NGOs working to embed animal welfare into sustainable development worldwide. We advocate for integrating animal welfare into international health, food, and environmental regimes, and trade and development finance rules. Since our establishment in 2020, WFA has become a UN-accredited force driving transformative change for animals by uniting peers and experts to influence global decision-making at the UN and other international institutions. We achieve global impact for animals – together.	https://wfa.org/
WHO South-East Asian Region		
Centre for Biomaterials, Cellular and Molecular Theranostics (CBCMT)	The Centre for Biomaterials, Cellular and Molecular Theranostics (CBCMT) at Vellore Institute of Technology is a multidisciplinary research hub dedicated to addressing global health challenges through innovation in biomaterials, cellular biology, and molecular therapeutics. CBCMT integrates expertise in chemistry, microbiology, biotechnology, engineering, and clinical research to develop novel diagnostics, therapeutics, and preventive strategies against in multiple sectors including infectious diseases and antimicrobial resistance (AMR). The centre houses advanced facilities for microbiological testing, molecular characterization, and preclinical evaluation, while	https://vit.ac.in/centres/cbcmt

also offering NABL-certified services to academia and industry. CBCMT actively collaborates with national and international partners to translate laboratory findings into impactful health solutions. Committed to capacity-building and student training, CBCMT strives to strengthen the AMR response by advancing cutting-edge research, supporting evidence-based policies, and fostering equitable access to treatment and prevention for vulnerable populations.

CNS (Citizen News Service)	"CNS is a feminist, campaigning and activist organisation to drive high impact and result-oriented policy, advocacy and communication initiatives on issues related to health, gender and development justice, with a focus on the Global South. Global news wire syndication service is one of the CNS flagship initiatives to further amplify our impact, which syndicates content to print and online media worldwide (mostly in Asia Pacific and African region). CNS advocates for development justice as health, gender, economic, social, redistributive, climate justices, as well as accountability to peoples, are interconnected and fundamental for a socially just and ecologically sustainable world. CNS hosts Global AMR Media Alliance (GAMA) to strengthen media engagement to prevent AMR and promote #HealthForAll. CNS is a member of Asia Pacific Civil Society Regional Coordination Mechanism, Network for Accountability of Tobacco Transnationals, WHO Civil Society Commission, International Network for Economic, Social and Cultural Rights, to name a few."	www.citizen-news.org
Delhi Society for Promotion of Rational Use of Drugs	Delhi Society for Promotion of Rational Use of Drugs (DSPRUD) is an independent, not-for-profit organization established in 1996 to advance rational medicine use, with a strong focus on antimicrobial resistance (AMR), patient education, and health system strengthening. DSPRUD has played a key role in shaping national and state-level policies, developing Standard Treatment Guidelines, and designing integrated frameworks for Diagnostic and Antimicrobial Stewardship and developing State Action Plan to combat AMR. Through innovative public education campaigns, including school-based outreach and traditional game adaptations, it has sensitized millions and amplified community voices. With over 15,000 health professionals trained, DSPRUD continues to build capacity among clinicians, nurses, and pharmacists, particularly in peripheral settings. Its work aligns with the WHO Civil Society Task Force's mission to foster collaboration, empower affected communities, and ensure equitable access to AMR prevention and care. DSPRUD remains committed to bridging policy and practice, strengthening stewardship, and contributing to India's leadership in the global AMR response.	https://www.dsprud.org/

Federation of Clinical Pharmacists in India (FCPI)	The Federation of Clinical Pharmacists in India (FCPI) is a non-profitable, professional organization that unites passionate pharmacists engaged in diverse clinical pharmacy roles across India and worldwide. Our members have voluntarily come together with the unwavering goal of advancing the clinical pharmacy profession, empowering pharmacists, and ensuring the delivery of safe, effective, and high-quality patient care.	https://www.fcpi.in/
Indian Medical Association Hq	The Indian Medical Association (IMA), established in 1928, is the only representative organisation of modern medicine doctors in India, with over 4 Lakh members with more than 1800 local branches in all 34 States and Union Territories. Beyond safeguarding doctors' interests, IMA engages in community health and national health priorities. IMA is a global pioneer in institutionalising the fight against antimicrobial resistance (AMR) through its dedicated Standing Committee on AMR. Initiatives such as the IMA AMR Smart Hospital Project and the National Alliance of Medical Professionals on AMR have set benchmarks in the stewardship programs. IMA has worked with the WHO, Commonwealth Medical Association (CMA), Specialist medical organisations, One Health stakeholders, Civil society groups, school students, NGOs, and the government to build capacity and drive policy initiatives on Antimicrobial Stewardship programs. Leveraging its vast network and strong leadership, IMA continues to drive Global and national AMR responses.	www.ima-india.org
Infection Control Academy of India	The Infection Control Academy of India (IFCAI) is a not-for-profit initiative working to make healthcare safer by strengthening infection prevention and control (IPC) in India and the Global South. As an independent voice, IFCAI champions advocacy, awareness, and evidence-based action to reduce healthcare-associated infections and fight the growing threat of antimicrobial resistance. At the heart of its mission is education—through practical training, workshops, and innovative learning platforms, IFCAI empowers healthcare workers, institutions, and communities with the knowledge and confidence to implement effective IPC practices. Collaboration is key: by building partnerships with universities, governments, and global organisations, IFCAI connects local efforts to international best practices. Every program and partnership reflects a simple vision—resilient health systems that protect patients, support professionals, and promote equity in public health. IFCAI believes safe healthcare is not a privilege but a right, and works every day to make it a reality.	www.ifcai.in
Medical Students Association of India	"The Medical Students' Association of India (MSAI) is the country's first and largest internationally represented medical students' organization, bringing together over 22,000 medical students nationwide. Founded with the vision of empowering future	https://www.msaindia.org/

healthcare professionals, MSAI fosters a community of informed, skilled, and socially responsible leaders. The organization is structured into six Standing Committees focusing on Public Health, Sexual and Reproductive Health, Medical Education, Human Rights and Peace, Professional Exchange, and Research Exchange. It also hosts two specialized units: the MSAI WHO-AMR Unit and the MSAI Bioethics Unit with WMA, addressing emerging global health challenges.

MSAI emphasizes meaningful youth engagement by equipping medical students with opportunities in advocacy, leadership, policy-making, international exchanges, and community outreach. Over the years, it has led impactful health campaigns, influenced policies, and represented Indian students globally. Today, MSAI stands as India's largest network of medical students, working collectively for a healthier, more equitable world."

Nepal Public Health Foundation (NPHF)	The Nepal Public Health Foundation (NPHF) is a leading non-governmental organization dedicated to strengthening public health systems, advancing research, and informing policy in Nepal. Established with the aim to bridge the gap between evidence and action, NPHF works across health priorities with a strong focus on infectious diseases, non-communicable diseases, health systems strengthening, and One Health. Antimicrobial resistance (AMR) is a key priority area, where NPHF has played a pivotal role in policy advocacy, evidence generation, and multi-sectoral engagement. It serves as the Nepal country partner of the Global Antibiotic Resistance Partnership (GARP) and has contributed to the development of the national AMR containment action plan. The Foundation conducts operational and policy research, raises public and professional awareness, and facilitates dialogue between human health, animal health, and environmental sectors. Through collaborations with government, academia, and international partners, NPHF positions itself as a national leader in combating AMR and promoting sustainable public health solutions.	https://www.nphfoundation.org/
SRM School of Public Health	Established in 2007, the School of Public Health at SRM Institute of Science and Technology prepares skilled public health professionals, epidemiologists, health managers, biostatisticians, and health data scientists through rigorous, practice oriented training. We use modern education technology, competency based curricula, and experiential learning to build real world capability. Our hub and spoke model links SRM's medical college, engineering, basic sciences, humanities, the Centre for Statistics, and biomedical engineering to drive interdisciplinary teaching, research,	https://www.srmist.edu.in/srm-school-of-public-health/

and community impact. The school has strong capability in designing and executing large scale surveys across India. Research focuses on marginalised and tribal communities, promotion of wellness across the life course, and emerging priorities such as antimicrobial resistance and planetary health. By integrating field engagement, analytics, and implementation science, SRM SPH advances evidence that improves population health while cultivating graduates who lead ethically, communicate clearly, and translate research into effective programmes and policies."

The Just Environment Charitable Trust (Toxics Link)	"Toxics Link is an Indian environmental organisation that has been addressing issues of chemicals and waste management for over two decades. The organisation has worked extensively with national and international partners, including UN agencies such as UNEP and WHO, as well as global civil society networks, to confront the challenges posed by hazardous chemicals and waste. In recent years, Toxics Link has engaged in tackling the growing threat of Antimicrobial Resistance through a multisectoral, One Health approach that integrates science, policy, and advocacy. Its work spans pharmaceutical pollution, biomedical waste management, and the overuse of antimicrobials in both healthcare and animal production sectors. This has been complemented by capacity-building initiatives with local authorities and stakeholders, along with sustained advocacy for stronger regulations and enforcement. Through evidence-based research and outreach, Toxics Link seeks to promote safer, more sustainable practices to reduce chemical pollution and AMR in India."	https://toxicslink.org/
---	---	---

WHO Western Pacific Region

Ateneo Center for Research and Innovation (ACRI)	The Ateneo Center for Research and Innovation (ACRI) is the research arm of the Ateneo School of Medicine and Public Health (ASMPH), Philippines. It is composed of four flagship programs—Biotechnology, Health Governance, Mental Health, and Environmental Health & Global Health Security—anchored by an Innovation Unit that drives interdisciplinary and policy-relevant research. ACRI has positioned antimicrobial resistance (AMR) as a cross-cutting priority, advancing One Health policy analysis, vaccine-AMR governance frameworks, and integration of AMR into climate and environmental health agendas. Supported by partners including the Department of Health, WHO, FAO, ICARS, and USAID, ACRI has contributed to the Philippine National Action Plan on AMR, multi-sectoral stakeholder engagement, and capacity-building for health leaders. Through partnerships with government agencies, international organizations, and local communities, ACRI fosters knowledge co-creation, capacity-building, and sustainable interventions that address both local and global needs. It	https://www.acri.ph/
--	---	---

serves as a platform for collaborative discovery, policy engagement, and training of the next generation of health leaders and researchers.

Global Health Security Network	The Global Health Security Network (GHSN) is a nonprofit, non-governmental organization (NGO) dedicated to advancing global health security through collaboration, research, and capacity building. GHSN brings together experts from public health, academia, policy, and security sectors to tackle critical global health threats, including pandemics, AMR, and other emerging biological risks. Through cross-sector partnerships and international knowledge sharing, GHSN works to strengthen preparedness, response, and resilience across health systems. The organisation also invests in workforce development, a bi-annual international conference, and promotes evidence-based strategies to support robust national and global health security frameworks.	https://www.ghsn.org
Pediatric Infectious Disease Society of the Philippines	The Pediatric Infectious Disease Society of the Philippines, Inc. (PIDSP) is a professional organization dedicated to advancing the prevention, diagnosis, and management of infectious diseases in the Philippines. Its mission is to uphold the highest standards of education, training, research, and clinical practice in pediatric infectious diseases, fostering professional excellence, integrity, and ethical conduct among its members. PIDSP envisions leading the fight against infectious diseases to safeguard the health and well-being of Filipino children through collaborative efforts in education, research, and clinical care. The society fulfills this vision by organizing educational activities, developing clinical practice guidelines, conducting research, and implementing outreach programs in partnership with local and international organizations to address pressing public health challenges.	https://www.pidsphil.org/home/
Philippine College of Physicians	The Philippine College of Physicians (PCP) is the national professional organization of internists in the Philippines, serving as the umbrella society of all specialists in Internal Medicine. Founded in 1953, the PCP is recognized as the accredited specialty society for Internal Medicine by the Philippine Medical Association (PMA). It is tasked with training, education, accreditation, research, and advocacy in Internal Medicine, helping set the standards for residency programs and postgraduate training in the country.	https://pcp.org.ph/
Philippine Society for Microbiology and Infectious Diseases	The Philippine Society for Microbiology and Infectious Diseases, Inc., or PSMID, is the country's leading professional association of specialists in infectious diseases and microbiology. From its humble beginnings, it became a national resource of expertise in the discipline, not only on issues about professional standards, but also on	www.psmid.org

infectious disease concerns of public health importance. Among its ranks are members who are the pillars of the subspecialty in the Philippines – eminent practitioners of national and international stature, and stars in the academe. Its vision be a globally-recognized and respected leader and authority dedicated to saving lives and reducing the burden of infectious diseases in the country.

The Australian Antimicrobial Resistance Network (AAMRNet)	<p>The Australian Antimicrobial Resistance Network (AAMRNet) is an inclusive, multi-stakeholder expert group committed to elevating Australia’s response to the global threat of AMR. Established in 2020, it is a public-private partnership operated by MTPConnect, Australia’s leading non-profit life sciences innovation accelerator. AAMRNet is strengthening the evidence base and building consensus around the need to improve equitable access to and strengthen the pipeline of innovations to prevent, diagnose, and treat drug-resistant infections. AAMRNet is the trusted thought leader on AMR policy in Australia and provides a unified voice to support and promote Australia’s role in the global fight against AMR. Its members and stakeholders include academia, industry, government, non-profits, and, from the frontline, clinicians and their patients. This whole-of-sector representation makes AAMRNet uniquely placed to help inform and shape policy-making at the highest levels.</p>	https://www.mtpconnect.org.au/programs/AAMRNet
Yayasan Orang Tua Peduli or YOP (The Concerned and Caring Parents Foundation)	<p>"The Concerned and Caring Parents Foundation (Yayasan Orang Tua Peduli/YOP) is an Indonesian civil society organization founded by parents and healthcare professionals to advance patient safety and the rational use of medicines. Guided by a vision of building a responsible health community, YOP empowers parents—especially mothers- through health education programs and promotes prevention as the foundation of a healthy life. YOP’s mission focuses on both preventive and curative aspects, including pregnancy and childbirth, nutrition, breastfeeding, immunization, early detection of growth and development, appropriate medication use, and prudent antibiotic use. Through advocacy, community engagement, capacity building, media outreach, and evidence generation, YOP collaborates with government, corporations, and international organizations. Its initiatives such as model clinics with WHO, educational sessions, and digital platforms have strengthened health literacy and promoted safer healthcare practices. YOP believes that everyone has a role in ensuring medication safety."</p>	https://milissehatyop.org/
