III. NATIONAL STATISTICS

Article 6
Each Member which ratifies this Protocol shall, based on the notifications and other available information, publish annually statistics that are compiled in such a way as to be representative of the country as a whole, concerning occupational accidents, occupational diseases and, as appropriate, dangerous occurrences and commuting accidents, as well as the analyses thereof.

Article 7
The statistics shall be established following classification schemes that are compatible with the latest relevant international schemes established under the auspices of the International Labour Organization or other competent international organizations.
III. NATIONAL STATISTICS

Article 6
Each Member which ratifies this Protocol shall, based on the notifications and other available information, publish annually statistics that are compiled in such a way as to be representative of the country as a whole, concerning occupational accidents, occupational diseases and, as appropriate, dangerous occurrences and commuting accidents, as well as the analyses thereof.

Article 7
The statistics shall be established following classification schemes that are compatible with the latest relevant international schemes established under the auspices of the International Labour Organization or other competent international organizations.
RECORDING AND NOTIFICATION OF OCCUPATIONAL DISEASES

- Enterprise, establishment and employer
- Person affected by the occupational disease
- Occupational disease
  - Name and nature of occupational disease
  - Harmful agents, processes or exposure to which the occupational disease is attributable
  - Description of work which gave rise to the condition
  - Length of exposure to harmful agents and processes
  - Date of diagnosis of the occupational disease.

Code of Practice for recording and notification of occupational accidents and diseases
## A NEED FOR A STANDARD CLASSIFICATION

<table>
<thead>
<tr>
<th>Production of reliable comparable data based on standard classifications</th>
<th>Identification of priorities to optimize interventions</th>
<th>Monitoring and evaluation of preventive measures</th>
<th>Easy access to rights: Compensation</th>
</tr>

ICD AND CLASSIFICATION OF DISEASES

- Silicosis
- Silicosis
- Pulmonary fibrosis
- Caplan- Collinet Syndrome
- Erasmus Syndrome
- Mineral pneumoconioses….
ICD-10 IN OCCUPATIONAL HEALTH: CHALLENGES

• Specific training

• Complex process to find the right code

• Correspondence between the list of occupational diseases and the codes

• Codification of disease associations
ICD-11 IN OCCUPATIONAL HEALTH: TOWARDS RELIABLE DATA AND INTEROPERABILITY ON OSH DISEASES AND INJURIES

• Digital Platform

• Ease and accuracy of coding requiring less user training

• Suggest changes or additions to ICD–11

• Complementarity between public health and occupational health systems
