

1. What aspects in your country's HNAP align well with the quality criteria?

2. What are some areas for improvement in your country's HNAP?

Leadership and enabling environment

MoH leads HNAP development

Govt endorsement/approval

Active engagement of the health sector in the process to formulate and implement the NAP

Climate-informed health planning and programming

MoH leads HNAP development

Active engagement of the health sector in the process to formulate and implement NAP

- Climate-informed health planning and programming

3. What are possible actions that can help address these areas?

- improved collaboration between the environment health agencies

- Knowledge sharing between agencies to facilitate comprehensive approach towards problem solving

1. What aspects in your country's HNAP align well with the quality criteria?

2. What are some areas for improvement in your country's HNAP?

**Cross-sectoral coordination and policy coherence**

☐ **Coordination and synergy with health-determining sectors**

3. What are possible actions that can help address these areas?

1. What aspects in your country's HNAP align well with the quality criteria?

2. What are some areas for improvement in your country's HNAP?

Building on existing mechanisms e.g. national vulnerability studies led by Ministry of Environment. This is the opportunity for the health sector to include and expand on the health areas

Cross sectoral coordination was mentioned several times. Very important, but also cross governance coordination is needed.

Thinking from the One Health perspective I've been wondering whether we need to in future think about better alignment between climate resilience and biodiversity plans

Comprehensive coverage of climate-sensitive health risks

Evidence-based HNAP

Coverage of climate-sensitive health risks

Prioritization of climate-sensitive health risks

3. What are possible actions that can help address these areas?

1. What aspects in your country's HNAP align well with the quality criteria?

2. What are some areas for improvement in your country's HNAP?

Comprehensive coverage of adaptation options and actions

Comprehensive adaptation options to address climate-sensitive health risks

Consideration of vulnerability factors

Prioritisation of health adaptation actions

3. What are possible actions that can help address these areas?

1. What aspects in your country's HNAP align well with the quality criteria?

There is leadership support in regards to Health Sector for CC (Minister level)

Health Sector uses a multi-sector approach

VnA process used for evidence and CSD's defined (but needs updating)

Effective Stakeholder Consultation, including community level

Data sourcing and analysis

Health is a leader in terms of an agency/sector led separate specific NAP development compared to other agencies

2. What are some areas for improvement in your country's HNAP?

implementation framework is weak

Increased community awareness on climate change

Speedy/faster approval process to allow Health NAP to be adopted (it has taken over 2 years and a change of Government)...

Ours is at development stage, due to lack of funding and the SIDS Context movement between islands increases the cost, so more funding to reach all major islands

Resourcing

☐ Estimation of the required resources for HNAP implementation – human and financial

☐ Resource mobilization strategy

3. What are possible actions that can help address these areas?

cross sectoral cooperation

sustainable strategies for M&E

More collaborations and workshops, developing a dedicated unit.

Intensive sensitisation and capacity building for the data providers and the analyst

Need to have specific funding for CCH (internal funds) rather than reliance on donor/external finance driven approach

1. What aspects in your country's HNAP align well with the quality criteria?

2. What are some areas for improvement in your country's HNAP?

Monitoring, evaluation and reporting

Comprehensive monitoring, evaluation and reporting plan included in HNAP

Periodic HNAP iterations

3. What are possible actions that can help address these areas?
