

Health and environment scorecard

Djibouti

Summary score: **30**

Exposure score: 32 Health score: 49 Policy score: 9

The scores represent simple averages.

[See methods and results for additional information.](#)

The scores are out of 100.

* Data not undergone country consultation/ not UN data. N/A: not available.

Djibouti

	Extent of the problem	Health impact	Policies
Biodiversity  View actions and interventions	 Terrestrial and marine area protected 1 % Global target: Conserve 30% of land, waters and seas by 2030.	INSUFFICIENT DATA	 Post-COP15 National Biodiversity Strategy and Action Plan submitted no
	Change in forest area 1990-2020  N/A Change in forest area (%)  N/A Change in forest area (km²)		
Chemicals  View actions and interventions	 Mean blood lead level in children under 5 years* 4 µg/dL International Health Regulations (IHR) capacity score for chemical events⁶ 20 % (out of 100%) ⁶Key informants report on attainment of a set of attributes for chemical events (core capacity 14) using a standard WHO instrument.	Poisoning deaths in 100,000 children under five, per year: 3 Regional values: 0 Min 6 Max	 Existence of legal limit on lead paint no  Existence of a poison centre N/A  Party to the Minamata Convention on Mercury yes
Radiation  View actions and interventions	International Health Regulations (IHR) capacity score for radiation emergencies⁷ 20 % (out of 100%) ⁷Key informants report on attainment of a set of attributes for radiation emergencies (core capacity 15) using a standard WHO instrument.	Deaths per 100,000 people from melanoma and other skin cancers, per year: 1 Number of deaths per 100,000 people from residential radon, per year:* <1	 Existence of standards on electromagnetic fields N/A  Existence of regulation of artificial tanning devices/sun beds N/A  Existence of national radon regulations for dwellings N/A

* Data not undergone country consultation/ not UN data. N/A: not available.
