Health and environment scorecard

Greece

62 Summary score:

Exposure score:

67

Health score:

75

Policies

45 Policy score:

The scores represent simple averages.

See methods and results for additional information.

The scores are out of 100.

Extent of the problem

3 x the WHO air quality guideline value for PM_{2.5}

WHO Guideline

(annual mean): 5 μg/m³

Annual country mean: 15 µg/m3

0% Population without clean fuels and technology for cooking

Health impact

16%

Deaths from stroke and ischaemic heart disease caused by air pollution1

Existence of legal standards for PM_{2.5}

yes

Compliant with WHO Air **Quality Guidelines**

no

Existence of national policy on household energy

N/A

¹ Air pollution causes many other diseases and adverse health outcomes, only stroke and ischaemic heart disease have been chosen for this scorecard.

WASH

View actions

and interventions

View actions nd interventions 1%

Population without safe drinking water2

8%

Population without safe sanitation2

² Operationalised as using safely managed

18%

Deaths from diarrhoea caused by unsafe drinking water, sanitation and inadequate personal hygiene

Sufficient funding for implementation of national plans

6	Urban N/A	Rural N/A
Drinking water	of what is needed	of what is needed
_

of what

is needed

Schools

drinking water and sanitation services.

Fossil fuels and traditional use of biomass in total final energy consumption

Percentage of hot days3 in 2050 under a high emissions scenario4

N/A

³A 'hot day' is a day when maximum temperature exceeds the 90th percentile threshold for that time of ear. The threshold is based on the period 1961

Analysis by the Climatic Research Unit, University of East Anglia, 2018.

Heat deaths in 2050 compared to 1961-1990 period under a high emissions scenario4 in the 65+ age group

N/A

⁵ Existence of a recent national assessment and plan refers to having conducted a climate change and health vulnerability and adaptation assessment and/or a health national adaptation plan (HNAP) since January 2020

Existence of recent national assessment and plan5

Vulnerability and adaptation

Health National Adaptation plan

(HNAP) assessment Commitment to

COP26 Health Programme

Sustainable low resilient health carbon health systems no

commitment systems no no

Net zero

Inclusion of health co-benefits in Nationally Determined Contribution (NDC)

no

^{*} Data not undergone country consultation/ not UN data. N/A: not available.

Chemicals

View actions and interventions Mean blood lead level in children under 5 years*

2 μg/dL

International Health Regulations (IHR) capacity score for chemical events6

60 %

(out of 100%)

6 Key informants report on attainment of a set of attributes for chemical events (core capacity 14) using a standard WHO instrument.

Poisoning deaths in 100,000 children under five, per year:

<1

Existence of legal limit on lead paint

yes

Existence of a poison centre

yes

Party to the Minamata Convention on Mercury

yes

Radiation

View actions

and interventions

International Health Regulations (IHR) capacity score for radiation emergencies7

100 %

(out of 100%)

Deaths per 100,000 people from melanoma and other skin cancers, per year:

5

Number of deaths per 100,000 people from residential radon, per year:*

7

Existence of standards on electromagnetic fields

yes

Existence of regulation of artificial tanning devices/sun beds

no

Existence of national radon regulations for dwellings

yes

* Data not undergone country consultation/ not UN data. N/A: not available.

⁷ Key informants report on attainment of a set of attributes for radiation emergencies (core capacity 15) using a standard WHO instrument.
