

Health and environment scorecard Indonesia

Extent of the problem

Health impact

Policies

Air pollution

4x the WHO air quality guideline value for PM_{2.5}

18% of population without clean fuels and technology for cooking

25% of deaths from stroke and ischaemic heart disease caused by air pollution¹

¹ Air pollution causes many other diseases and adverse health outcomes, stroke and ischaemic heart disease have been chosen for this country scorecard.

Existence of legal standards for PM_{2.5}

Compliant with WHO Air Quality Guidelines

Existence of national policy on household energy

WASH

70% of population without safe drinking water²

Percentage of population without safe sanitation²

INSUFFICIENT DATA

² Operationalised as using safely managed drinking water and sanitation services.

56% of deaths from diarrhoea caused by unsafe drinking water, sanitation and inadequate personal hygiene

Sufficient funding for implementation of national plans

Drinking water

<50% of what is needed

<50% of what is needed

Sanitation

<50% of what is needed

<50% of what is needed

WASH

50-74% of what is needed

<50% of what is needed

Climate change

87% fossil fuels and traditional use of biomass in total final energy consumption

Number of 'warm spell' days³ in 2050 under a high emissions scenario⁴

210 days

³ A 'warm spell' day is a day when maximum temperature, together with that of at least the 6 consecutive previous days, exceeds the 90th percentile threshold for that time of the year. The threshold is based on the period 1961-1990. Analysis by the Climatic Research Unit, University of East Anglia, 2018.

+11816 more heat deaths in 2050 compared to 1961-1990 period under a high emissions scenario⁴

Deaths per **100,000** people in the 65+ age group

0 heat deaths per year before 1990

23 heat deaths in 2050

⁴ High emissions scenario RCP8.5 - Representative Concentration Pathway 8.5.

⁵ Existence of a recent national assessment and plan refers to having conducted a climate change and health vulnerability and adaptation assessment and/or a health national adaptation plan (HNAP) since January 2020.

Existence of recent national assessment and plan⁵

Vulnerability and adaptation assessment

INSUFFICIENT DATA

Health National Adaptation plan (HNAP)

Commitment to COP26 Health Programme

Climate resilient health systems

Sustainable low carbon health systems

Net zero commitment

Inclusion of health co-benefits in Nationally Determined Contribution (NDC)

Health and environment scorecard Indonesia

Extent of the problem

Health impact

Policies

Biodiversity

5% of terrestrial and marine area protected

Global target: Conserve 30% of land, waters and seas by 2030

Change in forest area 1990-2020

-22% change in forest area

-264,120 km² change in forest area

INSUFFICIENT DATA

Post-COP15 National Biodiversity Strategy and Action Plan submitted

Chemicals

Mean blood lead level in children under 5 years

3 µg/dL

International Health Regulations (IHR) capacity score for chemical events

IHR capacity score of **40%** for chemical events⁶

60% not attained

⁶ Key informants report on attainment of a set of attributes for chemical events (core capacity 14) using a standard WHO instrument.

Less than **1** out of 100,000 children under five die from poisonings every year

Existence of legal limit on lead paint

INSUFFICIENT DATA

Existence of a poison centre

Party to the Minamata Convention on Mercury

Radiation

International Health Regulations (IHR) capacity score for radiation emergencies

IHR capacity score of **60%** for radiation emergencies⁷

40% not attained

⁷ Key informants report on attainment of a set of attributes for radiation emergencies (core capacity 15) using a standard WHO instrument.

1 out of 100,000 people die from melanoma and other skin cancers every year

Less than **1** out of 100,000 people die from residential radon every year

Existence of standards on electromagnetic fields

INSUFFICIENT DATA

Existence of regulation of artificial tanning devices/sun beds

INSUFFICIENT DATA

Existence of national radon regulations for dwellings

INSUFFICIENT DATA

Health and environment scorecard Indonesia

Extent of the problem

Occupational health

81%
of informal
employment in total
employment

12% of
the working age
population exposed
to long working
hours (≥55 hours/
week)

Health impact

43 out of 100,000 people of
working age die from diseases
due to occupational risks every year
Indonesia compared to regional values:

9th of 11 countries in the South-East
Asian Region

11 out of 100,000 people of
working age die from injuries
due to occupational risks every year
Indonesia compared to regional values:

10th of 11 countries in the South-East
Asian Region

Policies

Existence of programmes
for occupational health
and safety of health
workers

1 of 3 key international
labour conventions on occupational
safety and health ratified

C155
Occupational
safety and
health

C161
Occupational
health
services

C187
Promotional
framework

Health care facilities

Percentage of health care facilities without basic services

Water

20%

Sanitation
