

Health and environment scorecard India

Extent of the problem

Health impact

Policies

Air pollution

10x the WHO air quality guideline value for PM_{2.5}

WHO Guideline (annual mean): 5 µg/m³

India annual mean: 50 µg/m³

36% of population without clean fuels and technology for cooking

39% of deaths from stroke and ischaemic heart disease caused by air pollution¹

¹ Air pollution causes many other diseases and adverse health outcomes, stroke and ischaemic heart disease have been chosen for this country scorecard.

Existence of legal standards for PM_{2.5}

Compliant with WHO Air Quality Guidelines

Existence of national policy on household energy

WASH

Percentage of population without safe drinking water²

INSUFFICIENT DATA

48% of population without safe sanitation²

² Operationalised as using safely managed drinking water and sanitation services.

66% of deaths from diarrhoea caused by unsafe drinking water, sanitation and inadequate personal hygiene

Sufficient funding for implementation of national plans

	Urban	Rural
Drinking water	INSUFFICIENT DATA	INSUFFICIENT DATA

Sanitation	INSUFFICIENT DATA	INSUFFICIENT DATA
------------	-------------------	-------------------

	Health care facilities	Schools
WASH	INSUFFICIENT DATA	INSUFFICIENT DATA

Climate change

Percentage of hot days³ in 2050 under a high emissions scenario⁴

INSUFFICIENT DATA

³ A 'hot day' is a day when maximum temperature exceeds the 90th percentile threshold for that time of the year. The threshold is based on the period 1961-1990.

Analysis by the Climatic Research Unit, University of East Anglia, 2018.

Heat deaths in 2050 compared to 1961-1990 period under a high emissions scenario⁴

INSUFFICIENT DATA

⁴ High emissions scenario RCP8.5 - Representative Concentration Pathway 8.5.

⁵ Existence of a recent national assessment and plan refers to having conducted a climate change and health vulnerability and adaptation assessment and/or a health national adaptation plan (HNAP) since January 2020.

Existence of recent national assessment and plan⁵

INSUFFICIENT DATA
Vulnerability and adaptation assessment

INSUFFICIENT DATA
Health National Adaptation plan (HNAP)

Commitment to COP26 Health Programme

Climate resilient health systems

Sustainable low carbon health systems

Net zero commitment

Inclusion of health co-benefits in Nationally Determined Contribution (NDC)

Health and environment scorecard India

Extent of the problem

Chemicals

International Health Regulations (IHR) capacity score for chemical events

IHR capacity score of **80%** for chemical events⁶

⁶ Key informants report on attainment of a set of attributes for chemical events (core capacity 14) using a standard WHO instrument.

Health impact

1 out of 100,000 children under five die from poisonings every year

India compared to regional values:

5th of 11 countries in the South-East Asian Region

Policies

Existence of legal limit on lead paint

Existence of a poison centre

Party to the Minamata Convention on Mercury

Radiation

International Health Regulations (IHR) capacity score for radiation emergencies

IHR capacity score of **100%** for radiation emergencies⁷

⁷ Key informants report on attainment of a set of attributes for radiation emergencies (core capacity 15) using a standard WHO instrument.

Less than **1** out of 100,000 people die from melanoma and other skin cancers every year

Less than **1** out of 100,000 people die from residential radon every year

Existence of standards on electromagnetic fields

INSUFFICIENT DATA

Existence of regulation of artificial tanning devices/sun beds

INSUFFICIENT DATA

Existence of national radon regulations for dwellings

INSUFFICIENT DATA

Occupational health

89% of informal employment in total employment

10% of the working age population exposed to long working hours (≥55 hours/week)

36 out of 100,000 people of working age die from diseases due to occupational risks every year
India compared to regional values:

7th of 11 countries in the South-East Asian Region

8 out of 100,000 people of working age die from injuries due to occupational risks every year
India compared to regional values:

6th of 11 countries in the South-East Asian Region

Existence of programmes for occupational health and safety of health workers

INSUFFICIENT DATA

0 of 3 key international labour conventions on occupational safety and health ratified

C155
Occupational safety and health

C161
Occupational health services

C187
Promotional framework
