Health and environment scorecard Israel

Air pollution

Extent of the problem

18%

Health impact

from stroke and ischaemic heart

disease caused by air pollution1

of deaths

100

Policies

Existence of legal standards for PM₂₅

Compliant with WHO Air **Quality Guidelines**

Existence of national policy on household energy

INSUFFICIENT DATA

the WHO air quality guideline value for PM₂₅

WHO Guideline (annual mean): $5 \mu g/m^3$

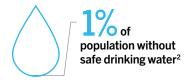

of population without clean fuels and technology for cooking

1 Air pollution causes many other diseases and adverse health outcomes, stroke and ischaemic heart disease have been chosen for this country scorecard.

population without safe sanitation²

² Operationalised as using safely managed drinking water and sanitation services.

8% of deaths from diarrhoea caused by unsafe drinking water, sanitation and inadequate personal hygiene

Sufficient funding for implementation of national plans

Urban

INSUFFICIENT INSUFFICIENT DATA DATA

DATA

Rural

facilities

INSUFFICIENT INSUFFICIENT DATA DATA

Climate

Percentage of hot days³ in 2050 under a high emissions scenario4

Analysis by the Climatic Research Unit, University of East Anglia, 2018.

Heat deaths in 2050 compared to 1961-1990 period under a high emissions scenario4

INSUFFICIENT DATA

Existence of recent national assessment and plan5

INSUFFICIENT DATA

INSUFFICIENT DATA

Vulnerability and Health National Adaptation plan (HNAP) adaptation assessment

Commitment to **COP26 Health Programme**

Climate Sustainable low resilient health carbon health systems

Net zero commitment

Inclusion of health co-benefits in Nationally Determined Contribution (NDC)

³ A 'hot day' is a day when maximum temperature exceeds the 90th percentile threshold for that time of the year. The threshold is based on the period 1961-

⁴ High emissions scenario RCP8.5 - Representative Concentration Pathway 8.5.

⁵ Existence of a recent national assessment and plan refers to having conducted a climate change and health vulnerability and adaptation assessment and/or a health national adaptation plan (HNAP) since January 2020.

Health and environment scorecard Israel

Extent of the problem

Health impact

Policies

Chemicals

International Health Regulations (IHR) capacity score for chemical events⁶

Less than out of 100,000 children under five die from poisonings every year

Existence of legal limit on lead paint

Existence of a poison centre

Party to the Minamata Convention on Mercury

INSUFFICIENT DATA

⁶ Key informants report on attainment of a set of attributes for chemical events (core capacity 14) using a standard WHO instrument.

Radiation

International Health Regulations (IHR) capacity score for radiation emergencies⁷

INSUFFICIENT DATA

⁷ Key informants report on attainment of a set of

attributes for radiation emergencies (core capacity 15)

using a standard WHO instrument.

out of 100,000 people die from melanoma and other skin cancers every year

out of 100,000 people die from residential radon every year

Existence of standards on electromagnetic fields

Existence of regulation of artificial tanning devices/sun beds

Existence of national radon regulations for dwellings

INSUFFICIENT DATA

Occupational health

Percentage of informal employment in total employment

INSUFFICIENT DATA

3/0 of the working age population exposed to long working hours (≥55 hours/ week) out of 100,000 people of working age die from diseases due to occupational risks every year Israel compared to regional values:

1 out of 100,000 people of working age die from injuries due to occupational risks every year Israel compared to regional values:

Existence of programmes for occupational health and safety of health workers

INSUFFICIENT DATA

0 of 3 key international labour conventions on occupational safety and health ratified

C155

Occupational safety and health

C161
Occupational health

C187
Promotional framework
