

Health and environment scorecard

Kyrgyzstan

Extent of the problem

Air pollution

8x the WHO air quality guideline value for PM_{2.5}

23% of population without clean fuels and technology for cooking

Health impact

32% of deaths from stroke and ischaemic heart disease caused by air pollution¹

¹ Air pollution causes many other diseases and adverse health outcomes, stroke and ischaemic heart disease have been chosen for this country scorecard.

Policies

Existence of legal standards for PM_{2.5}

Compliant with WHO Air Quality Guidelines

INSUFFICIENT DATA

Existence of national policy on household energy

INSUFFICIENT DATA

WASH

24% of population without safe drinking water²

7% of population without safe sanitation²

² Operationalised as using safely managed drinking water and sanitation services.

57% of deaths from diarrhoea caused by unsafe drinking water, sanitation and inadequate personal hygiene

Sufficient funding for implementation of national plans

Drinking water

Urban

<50% of what is needed

Rural

50-74% of what is needed

Sanitation

<50% of what is needed

INSUFFICIENT DATA

WASH

Health care facilities

INSUFFICIENT DATA

Schools

INSUFFICIENT DATA

Climate change

70% fossil fuels and traditional use of biomass in total final energy consumption

Percentage of hot days³ in 2050 under a high emissions scenario⁴

INSUFFICIENT DATA

³ A 'hot day' is a day when maximum temperature exceeds the 90th percentile threshold for that time of the year. The threshold is based on the period 1961-1990. Analysis by the Climatic Research Unit, University of East Anglia, 2018.

Heat deaths in 2050 compared to 1961-1990 period under a high emissions scenario⁴

INSUFFICIENT DATA

⁴ High emissions scenario RCP8.5 - Representative Concentration Pathway 8.5.

⁵ Existence of a recent national assessment and plan refers to having conducted a climate change and health vulnerability and adaptation assessment and/or a health national adaptation plan (HNAP) since January 2020.

Existence of recent national assessment and plan⁵

INSUFFICIENT DATA

Vulnerability and adaptation assessment

INSUFFICIENT DATA

Health National Adaptation plan (HNAP)

Commitment to COP26 Health Programme

Climate resilient health systems

Sustainable low carbon health systems

Net zero commitment

Inclusion of health co-benefits in Nationally Determined Contribution (NDC)

Health and environment scorecard Kyrgyzstan

Extent of the problem

Health impact

Policies

Biodiversity

7% of terrestrial and marine area protected

Global target: Conserve 30% of land, waters and seas by 2030

Change in forest area 1990-2020

+16% change in forest area

+1,790 km² change in forest area

INSUFFICIENT DATA

Post-COP15 National Biodiversity Strategy and Action Plan submitted

Chemicals

Mean blood lead level in children under 5 years

4 µg/dL

International Health Regulations (IHR) capacity score for chemical events

IHR capacity score of **40%** for chemical events⁶

60% not attained

⁶ Key informants report on attainment of a set of attributes for chemical events (core capacity 14) using a standard WHO instrument.

Less than **1** out of 100,000 children under five die from poisonings every year

Existence of legal limit on lead paint

Existence of a poison centre

INSUFFICIENT DATA

Party to the Minamata Convention on Mercury

Radiation

International Health Regulations (IHR) capacity score for radiation emergencies

IHR capacity score of **40%** for radiation emergencies⁷

60% not attained

⁷ Key informants report on attainment of a set of attributes for radiation emergencies (core capacity 15) using a standard WHO instrument.

1 out of 100,000 people die from melanoma and other skin cancers every year

1 out of 100,000 people die from residential radon every year

Existence of standards on electromagnetic fields

INSUFFICIENT DATA

Existence of regulation of artificial tanning devices/sun beds

INSUFFICIENT DATA

Existence of national radon regulations for dwellings

INSUFFICIENT DATA

Health and environment scorecard Kyrgyzstan

Extent of the problem

Occupational health

62% of informal employment in total employment

12% of the working age population exposed to long working hours (≥55 hours/week)

Health impact

20 out of 100,000 people of working age die from diseases due to occupational risks every year
Kyrgyzstan compared to regional values:

4 out of 100,000 people of working age die from injuries due to occupational risks every year
Kyrgyzstan compared to regional values:

Policies

Existence of national policy instruments for occupational health and safety for health workers

INSUFFICIENT DATA

0 of 3 key international labour conventions on occupational safety and health ratified

C155
Occupational safety and health

C161
Occupational health services

C187
Promotional framework

Health care facilities

Percentage of health care facilities without basic services

Water

60%

Sanitation

INSUFFICIENT DATA

Hygiene

INSUFFICIENT DATA

Waste management

INSUFFICIENT DATA

INSUFFICIENT DATA

Percentage of health care facilities without reliable electricity supply

INSUFFICIENT DATA

Climate assessment conducted for:

INSUFFICIENT DATA

Climate resilience

INSUFFICIENT DATA

Environmental sustainability

Existence of standards for WASH in health care facilities

INSUFFICIENT DATA

Existence of standards for health care waste management
