Summary of MPOWER measures in Nepal

Compliance is scored 0—10 where 10 is the highest level of compliance. Compliance is measured only for P and E.
The methods used to compile this profile are described in the technical notes of the *WHO report on the global tobacco epidemic, 2023*.

Other indirect bans	No	
Compliance score of indirect bans		8
Law requires fines for violations of indirect advertising bans	Yes	

¹ The law does not explicitly address cross-border advertising. However, given that advertising is banned on all TV and radio, it is interpreted that both domestic and international levels are covered by the ban.

² The law does not explicitly address cross-border advertising. However, given that advertising is banned in all magazines and newspapers, it is interpreted that both domestic and international levels are covered by the ban.

³ Although the law does not explicitly ban the identification of non-tobacco products with tobacco brand names (brand stretching) and does not provide a definition of tobacco advertising and promotion, we interpret that brand stretching is covered by the existing ban of all forms of advertising and promotion because this country is a Party to the WHO FCTC and we assume that the WHO FCTC definition applies.

Subnational laws on tobacco advertising, promotion and sponsorship

All subnational jurisdictions are covered by a complete national TAPS law.
