**HOSPITAL STATUS**

"Only 16 (46%) out of 35 hospitals evaluated are partially functioning."*

*Building condition*

- Partially damaged: 26
- Fully damaged: 5

*Equipment condition*

- Partially damaged: 18
- Fully damaged: 13

*Functionality* *

- Partially functioning: 16
- Non-functional: 14
- Destroyed: 5

*Accessibility*

- Partially accessible: 11
- Inaccessible: 0
- Destroyed/non-functional: 19

---

**THE MAIN CAUSES OF...**

**Building damage**

- Top 3 of building damage reported by 26 partially damaged and 5 fully damaged hospitals.
- 100% Conflict/attack/looting
- 100% Lack of maintenance
- 13% Man-made disaster
- 19% Lack of maintenance

**Equipment damage**

- Top 3 of equipment damage reported by 18 partially damaged and 13 fully damaged hospitals.
- 100% Conflict/attack/looting
- 100% Man-made disaster
- 67% Partial-functionality
- 47% Inaccessibility
- 46% Damage of the HSDU
- 9% Financial

**Partial-functionality**

- Top 3 causes of functionality constraints reported by 16 partially functioning and 14 non-functional hospitals.

**Inaccessibility**

- Top 3 causes of accessibility constraints reported by 11 partially accessible hospitals.

---

**BASIC AMENITIES**

- Main water sources
  - Piped Supply Network: 75%
  - Tube well/borehole: 58%
  - Other: 17%
- Power sources
  - Generator: 100%
  - Solar system: 86%

---

**INPATIENT BED CAPACITY**

- ICU beds: 81
- Maternity beds: 208
- General inpatient beds: 1462

---

**SERVICE DOMAIN OVERVIEW**

</tbody>
</table>

## Note

1. Causes of non-functionality, basic amenity types, and barriers impeding service availability, was limited to the top three most frequently reported responses.
2. The second page provides a restricted overview of essential health services, highlighting selected priority services.
3. The analysis of barriers impeding service availability was limited to Hospitals where the health service is not available up to standard.
