

HeRAMS Ukraine | Dnipropetrovska

SNAPSHOT AUGUST 2025

OPERATIONAL STATUS

Out of 140 HFs* evaluated.

HF by type

MAIN CAUSES OF...

Building damage

The 2 primary causes of building damage reported by 16 partially damaged HFs.

Equipment damage

The 2 primary causes of equipment damage reported by 6 partially damaged HFs.

Functionality constraints

The primary cause of functionality constraints reported by 3 partially functioning and 2 non-functioning HFs.

Accessibility constraints

The 2 primary causes of accessibility constraints reported by 2 partially accessible HFs.

* This analysis is based on data from legally registered health facilities (HFs). Service delivery units such as feldsher-midwife stations and outpatient clinics that are administratively part of these facilities were not included here.

** HFs reported as destroyed, non-functioning, or inaccessible are deemed unable to provide any health services, hence categorized as non-operational. Consequently, reporting ends upon confirmation of a HF's non-operational status.

Out of 138 HF partially and fully operational HF.

Partner support types

Out of 43 HF receiving major or partial support from partners.

BASIC AMENITIES*

Out of 138 HF partially and fully operational HF.

Available Partially available Not available

WASH

Water

Main water sources

Out of 138 HF where water is at least partially available.

Water storage

Sanitation facilities

Out of 138 HF where sanitation facilities is at least partially available.

Sanitation facilities types*

Sanitation facilities accessibility*

Hand-hygiene facilities

Cleaning equipment

Cold chain

Cold chain sources

Out of 118 HF where cold chain is at least partially available.

Waste management

Waste segregation

Final disposal of sharps

Final disposal of infectious waste

Waste disposal methods

Out of 130 HF where final disposal of sharps or infectious waste are at least partially available.

Power

Power sources

Out of 138 HF where power is at least partially available.

Inpatient bed capacity*

Main barriers*

Out of 6 HF where inpatient bed capacity is not available up to standards.

*Out of 138 HF. HF reported as destroyed, non-functioning, or inaccessible are considered unable to provide health services in their current state and are therefore excluded from this section.

BASIC AMENITIES*

Out of 138 HFIs partially and fully operational HFIs.

● Available ● Partially available ● Not available

Transportation of patients

3%

97%

Not available up to standard in 4 (2.9%) out of 138 HFIs expected to have water available.

Transportation types

Out of 135 HFIs where transportation of patients is at least partially available.

Car 93% Ambulance 34% Truck 5%

Heating

1%

99%

Not available up to standard in 2 (1.4%) out of 138 HFIs expected to have water available.

Heating sources

Out of 138 HFIs where heating is at least partially available.

Public centralized heating 60% Autonomous heating with boiler room 39% Autonomous electric heating 21%

Communications Equipment Sufficiency

3%

97%

Not available up to standard in 4 (2.9%) out of 138 HFIs expected to have communication means.

Communication equipment types

Out of 138 HFIs where communication is at least partially available.

Internet/mobile data 94% Computer 93% Mobile phone 87%

Connectivity

3%

97%

Not available up to standard in 4 (2.9%) out of 138 HFIs expected to have water available.

Connectivity types

Out of 138 HFIs where connectivity is at least partially available.

Landline 95% Mobile data 46% Satellite 30%

Health information management systems

eHealth

100%

Available up to standard in all 138 HFIs where the information system is expected.

Data entrance into the eHealth

100%

Available up to standard in all 138 HFIs where the information system is expected.

Epidemiological Reports

1%

99%

Not available up to standard in 1 (0.8%) out of 133 HFIs where the information system is expected.

Activity Reports

100%

Available up to standard in all 138 HFIs where the information system is expected.

eHealth trainings to health staff

100%

Available up to standard in all 138 HFIs where the information system is expected.

ESSENTIAL HEALTH SERVICES*

Service domain overview

● Available ● Partially available ● Not available ● Not normally provided

General clinical and trauma care

Child health and nutrition

Communicable diseases

Sexual and reproductive health

NCD and mental health

*Out of 138 HFIs. HFIs reported as destroyed, non-functioning, or inaccessible are considered unable to provide health services in their current state and are therefore excluded from this section.

Availability status

Available Partially available Not available

Barriers for partial availability or non-availability.

Lack of staff Lack of supplies Lack of financial resources
Lack of training Lack of equipment

General clinical and emergency care

* Out of 138 HF. HF reported as destroyed, non-functioning, or inaccessible are considered unable to provide health services in their current state and are therefore excluded from this section.

Availability status

Available Partially available Not available

Barriers for partial availability or non-availability.

Lack of staff Lack of supplies Lack of financial resources
Lack of training Lack of equipment

Child health and nutrition

Communicable diseases

Sexual and reproductive health

STI and HIV/AIDS

Availability status

Available Partially available Not available

Barriers for partial availability or non-availability.

Lack of staff Lack of supplies Lack of financial resources
Lack of training Lack of equipment

Sexual and reproductive health (cont.)

Maternal and newborn health

Family planning

Antenatal care

Skilled care during childbirth

Basic Emergency Obstetric Care

Comprehensive Emergency Obstetric Care

Postpartum care

Comprehensive abortion care

Sexual violence

Clinical management of rape survivors

Emergency contraception

Post-exposure prophylaxis

Noncommunicable diseases and mental health

Promote self-care

NCD Clinic

Asthma and Chronic Obstructive Pulmonary Disease

Availability of cancer diagnostics services

Primary cancer screening

Availability of Mammography

Availability of Hysteroscopy

Availability of Esophagogastro-duodenoscopy

Availability status

Available Partially available Not available

Barriers for partial availability or non-availability.

Lack of staff Lack of supplies Lack of financial resources
Lack of training Lack of equipment

Noncommunicable diseases and mental health (cont.)

This analysis was produced based on the information reported into HeRAMS up to 27 August 2025 and while the deployment of HeRAMS, including data verification and validation, continue. Hence, this analysis is not final and is produced solely for the purposes of informing operations.

The designations employed and the presentation of the material in this report do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city, or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

Notes:

1. Causes of non-functionality, basic amenity types, and barriers impeding service availability, were limited to the top three most frequently reported responses.
2. The analysis of barriers impeding service availability was limited to HFIs where the health service is not available up to standard.
3. The analysis of individual services was limited to HFIs expected to provide the specific service.
