

Countries, territories and areas showing the distribution of Zika virus, 2013 - 2016

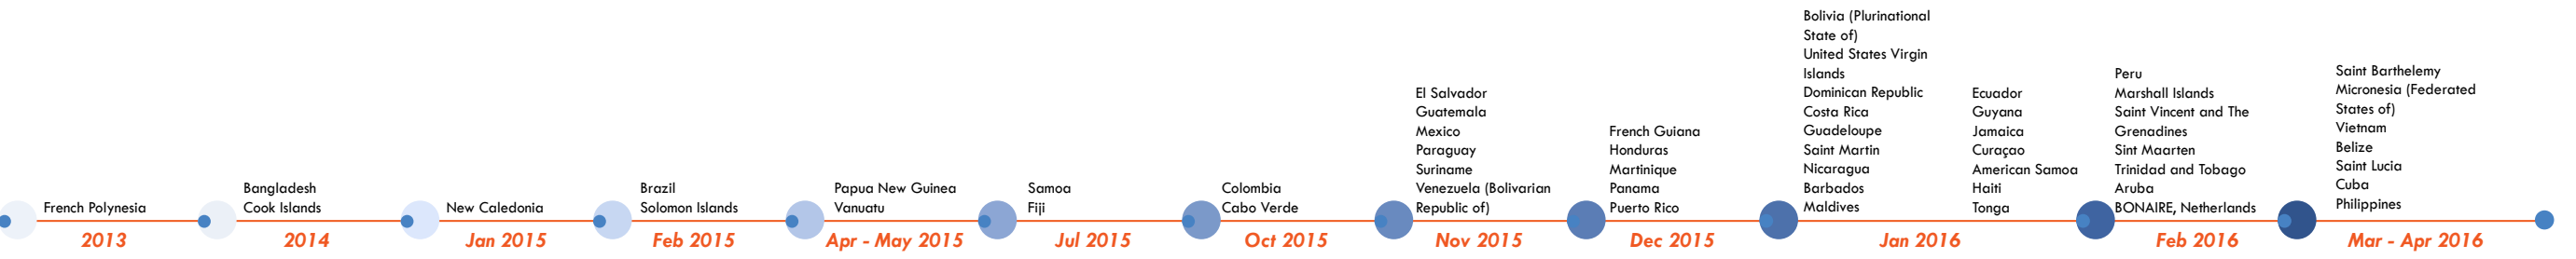

MAP DATE: 04 May 2016

ISLA DE PASCUA, Chile is not displayed in the map with the given uncertainty in the start date.
Thailand, Cambodia and Lao People's Democratic Republic circulation started before 2013.

The countries with locally acquired without vector borne transmission are not shown in the map.
Available information does not allow measurement of the risk of infection; variable transmission among countries is not represented on this map.

- Countries where circulation started before 2013
- Disputed Areas
- Disputed Borders

The boundaries and names shown and the designations used on this map do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.
