

***Seeking inputs on the draft Urban Yellow Fever Risk Management
Handbook for national preparedness and response planning
Feedback Form***

Instructions for providing feedback on the draft Urban Yellow Fever Risk Management handbook

WHO has developed a draft handbook to support countries in preparing for urban yellow fever (YF) outbreaks. The handbook outlines strategies to strengthen national preparedness and response, proposing risk-tailored actions to prevent and control urban transmission.

We invite you to use the form below to submit your feedback on the draft *Urban Yellow Fever Risk Management: Handbook for National Preparedness and Response Planning*.

You can transform it into a Word document or ask for a Word version of the form by contacting us at EYE.Strategy@who.int.

Main sections of the draft handbook include:

- **Section 1** Introduction
- **Section 2** An overview of urban YF
- **Section 3** General approach for managing urban YF risk
- **Section 4** Key knowledge and tools per pillar
- **Section 5** High-risk countries: preparedness and response action lists
- **Section 6** Moderate and potential risk countries: preparedness and response action lists

The preparedness and response action lists are organized under seven thematic areas. You may choose to focus your feedback on the area(s) most relevant to your expertise.

Using the Navigation pane in Microsoft Word can greatly facilitate reviewing the document and locating specific sections quickly and efficiently.

Note: please include your name and contact details so we can properly credit your contributions in the document's acknowledgements section.

Public submission forms must be returned to WHO no later than **14 November 2025** by sending them to the following email address: EYE.Strategy@who.int
