### Sustainable Rural Communities

- (Employment)?
- Is there a local school for my children?
- Is there a local facility where I can access healthcare?

# So what is the effect in terms of access when you close down rural healthcare facilities

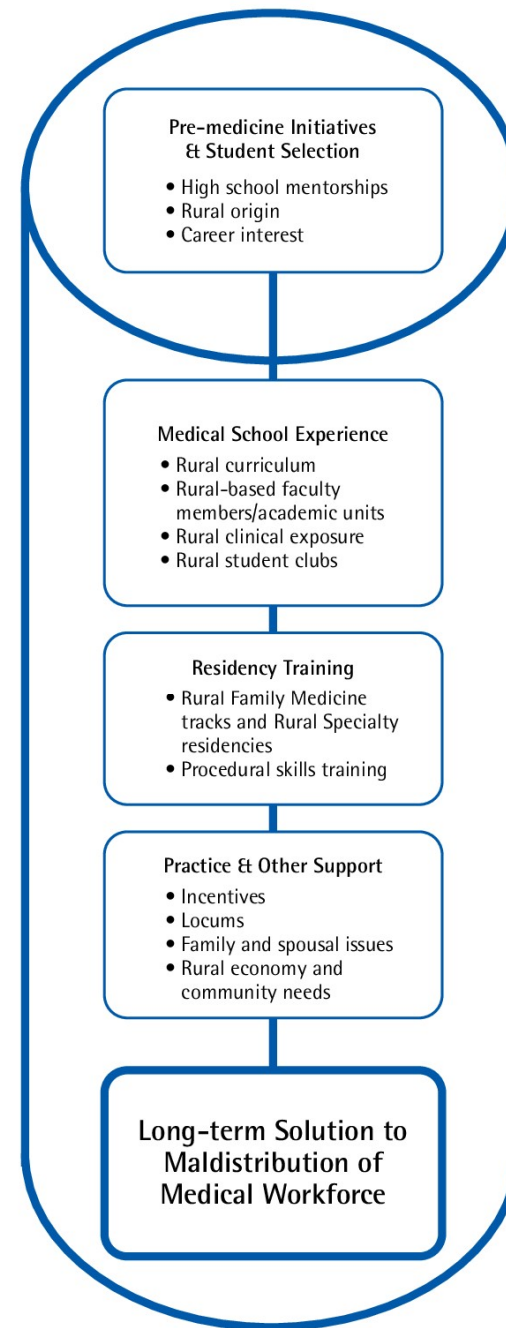

Red-Blue shows areas by estimate added distance after local GP loss  
Vulnerable areas shown in red

Equitable access to healthcare is a crucial marker of democracy....

# Community Healthcare West

- **9 Islands in our Region**
- **In Galway:**
- **Inis Mór, Inis Meain, Inis Oírr & Inishbofin**  
covering a population of 1,411 people
- **In Mayo:**  
**Clare Island, Inisturk, Inis Bigil Inishlyre & Collanmore**  
covering a population of 263 people

# Clare Island eHealth Initiatives

## About Clare Island

- Located 5.5km off west coast of County Mayo, Ireland
- Ferry crossing from Roonagh Pier approx. 25 minutes
- Population 168
- 2 x Public Health Nurses based in health centre on Island

## Aim(s)

To allow people to live healthier and longer in their own communities through the use of digital technologies.

## Dependencies

Improved network connectivity to the island

## Challenges

Poor cellular (mobile phone/data) coverage and broadband (3Mb/s)

## Progress to date

- Efforts underway to engage with telecommunication operators to improve coverage
- Funding for a number of projects by multiple collaborators secured to pilot wearables as a method to inform citizens of their health and to securely alert health teams should their health deteriorate
- 'Pod' commissions as a space to conduct telemedicine consultations with health teams on mainland
- broadband connection point (BCP) to community centre installed

## Community Healthcare West

### Population breakdown by age cohorts by county

# Community Healthcare Networks

## **Benefits of Community Healthcare Networks**

CHNs will improve the experience for people using our services by:

- supporting people to live more independently in the community
- coordinating and integrating services to meet our changing health needs
- supporting collaborative working to provide person-centred care
- ensuring timely access to services nationwide
- Access to diagnostics

## **Benefits for people who use our services**

- more locally accessible services
- efficient movement from community to acute services and back
- more care at home than in hospitals
- prioritisation of service-based on needs
- early intervention and prevention

# Community Health Network

Community Healthcare West is a diverse large geographical area ranging from large urban sites to remote rural areas and 6 offshore island inhabited

- Service delivery is being reoriented towards general practice, primary care and community-based services where teams will work in an integrated way with the National Ambulance Service (NAS) and acute services to deliver end-to-end care, keeping people out of hospital and embracing a 'home first' approach. Key developments of the Enhanced Community Care Programme within Community Healthcare West include:
  - 367 WTE new staff to support ECC
  - Roll out 9 Community Healthcare Networks
  - Development of 3 Community Specialist Teams for Chronic Disease
  - Establishment of Mayo Community Intervention Teams –
  - Community Diagnostics – Ongoing development of community based services to support GP access to Diagnostics
  - Development of Health and Well being supports to enable people living within Community Healthcare West to lead healthier lifestyles.

## Area Based Teams - 19

To ensure local areas of disadvantage have access to the full enhanced Health and Wellbeing Programme, a core group of services will be established to support people and families within the community. These initiatives include:

| Area Based Team                               |   |
|---|---|
| Service                                       | Description   |
| Stop Smoking Services                         | A dedicated stop smoking resource to support smokers within the community with quit attempts, including the provision of NRT and Stop Smoking medication  |
| We Can Quit                                   | We Can Quit is an additional free, friendly and supportive 12-week programme to help attendees quit smoking and stay quit for good  |
| Social Prescribing                            | Implementation of community based social prescribing services. A social prescribing link worker will provide interventions and also provide referrals to community-based services   |
| Parenting Programmes                          | Parenting Programmes providing families of greater need access to evidence based parenting programmes for vulnerable families   |
| Healthy Food Made Easy                        | The Healthy Food Made Easy (HFME) Programme will provide a basic nutrition and cookery course that helps people to change to a healthy diet, plan meals on a budget and make easy to cook meals   |
| MECC  | Making Every Contact Count programme will work with local health professionals to ensure they have the capability to deliver brief interventions and advice for all patients regarding healthy behaviours (Smoking, Alcohol Use, Physical Activity, Diet and Nutrition) |
| Programmes supported by a Healthy Communities |   |
