

Building Resilience Against Outbreaks & Pandemics

Research to identify
sustainable solutions

The 3rd Global Research and Innovation
Forum

The pandemic as a catalyst for innovation: a fit for purpose regulatory and ethics framework

Key research achievements / Progress update

Prof. Caesar Atuire

Department of Philosophy and Classics, University of Ghana
Nuffield Department of Medicine, University of Oxford

A fit for purpose regulatory and ethics framework

Rethinking Research: Governance, Access, and Equity

Ethics is about moral value judgments; what should we doing to get it right?

During the Covid-19 outbreak the WHO increasingly became a moral voice.

How do we build an **allyship/coalition** between researchers and ethicists for success in addressing future outbreaks and pandemics?

Key research achievements / Progress update

Lessons Learned

build an evidence base and strengthen relationship between global/local and technical

Defining Solidarity, Equity and Access: Ethics to Policy Programme of Work

work building on Pandemic Summit to more effectively operationalize ethics

Trust and Trustworthiness: Ethics, social listening and infodemic management

sub-group established to develop WHO guidance (publication early 2024)

Ethical Governance follow-up work

Public-private partnerships

New models of global governance architecture – regional hubs?

Research Ethics Oversight/Governance

Input into Clinical trial resolution

Addressing gaps in guidance - adaptive trial designs, evidence & ethics

Focusing on underrepresented & marginalized populations

Strengthening capacity – WHO benchmarking tool + Epidemic Ethics etc.

Reforming ethics oversight – i.e. follow-up to Lisbon meeting and survey
