

Pillars of Parenting program in Tanzania

Care

Protect

Communicate

Care

Protect

Communicate

To start

- Integration of Mental health components in parenting program
- Documentation of the best practices and lessons learned in the country
- Strengthen linkage between Health facilities, schools and communities
- Engage Integrated Community Health Workers in Parenting
- Implement targeted and intensive parenting program refugees , children with disabilities

To Continue

- Strengthen Multisectoral Coordination and Collaboration at National and Subnational Levels
- Implementation of the joint multisectoral work plan
- Integration of Health, Nutrition and Parenting initiatives into revised pre-services Curriculum for colleges and higher learning institutions
- Male engagement in parenting programs

To Stop

- Implementation of non-evidenced parenting programs
- Implementation of silos parenting programme that are not national frameworks.
