The primary objective of the EIOS Training of Trainers (ToT) workshop is to teach participants how to successfully deliver training on EIOS and public health intelligence (PHI). Through this 5-day workshop, we aim to ensure that EIOS trainers are well equipped to deliver consistent, high-quality training to Member States and others adopting the EIOS system.

Workshop Highlights Include:

- Lessons Learned from Experienced EIOS Facilitators
- Adults as Learners and Teaching Technical Content
- Deep Dive into the EIOS System
- Round Robin Presentations

Upon completion, participants will continue to deliver PHI and EIOS training sessions worldwide.

WORKSHOP GOALS

1. UNDERSTAND
   Understand the basic principles of adult learning theory and teaching technical content.

2. COMMUNICATE
   Communicate the advantages of implementing PHI by describing key terms, outlining information sources and the relationship with public health surveillance.

3. DESCRIBE
   Describe the history, objectives and components of the EIOS initiative and its positioning within the Hub for Pandemic and Epidemic Intelligence and the broader PHI community.

4. APPLY
   Apply learned skills to train adult learners on the main features of the EIOS system, its layout and functions and its use for the monitoring and communication of health threats through a 3-day EIOS training course.
