Wiley Miller really hit the nail on the head with this drawing, and with his crafty use of "heard mentality" word play. It's like he reached into our brains and sketched what we were thinking. This is a perfect illustration of how COVID-19 misinformation and disinformation can be harmful. Or worse, lethal.
OPPORTUNITIES FOR ACTION

Do you want to play a role in helping manage the COVID-19 infodemic? Seize one of these opportunities below.

Apply to the 1st WHO training in infodemic management. Application deadline is 18 October 2020.

To successfully mitigate the current infodemic and promote more effective future response, participants from the WHO first infodemiology conference recently contributed to a draft public health research agenda that cuts across many fields of specialization. From physics to law to behavioral science to epidemiology to user experience and design—it’s clear that an infodemic manager would need a wider array of skills and expertise to successfully address infodemics that go beyond traditional boundaries of epidemiology, risk communication and community engagement and digital media. WHO and partners invite applications from experienced professionals from the fields of epidemiology, risk communication, health service delivery/health care workers, digital health, policy making (in health and intersectoral), who are responding to
FORGING A PATH TO A BETTER INFORMATION ECOSYSTEM

EFFECTIVE GOVERNANCE, MEDIA, INTERNET AND PEACEBUILDING RESPONSES TO DISINFORMATION

5-23 OCTOBER, 2020

Inviting researchers, UN agencies, civil society groups, policy makers, media, peacebuilders, fact checkers, technologists and others tackling disinformation.

Register

Part of the Future of Governance Consultation Series

Play an active role in this consultation from 5-23 October 2020.
The United Nations Development Programme (UNDP) and United Nations Educational, Scientific and Cultural Organization (UNESCO), have teamed up to conduct a three-week online global consultation exploring the drivers and responses to the growing problem of disinformation. The consultation rooms are fully moderated and open 24/7, so we're encouraging experts in the field to drop in anytime to have a lively discussion on the impact of disinformation.

Play this game.

GO VIRAL! is a 5-minute game that helps you learn about some of the most common strategies used to spread false and misleading information about COVID-19. Understanding these tricks allows you to resist them the next time you come across them online. Then fight the spread of misinformation by

Johns Hopkins Center for Communication Programs has developed a dashboard that presents data from a global survey of knowledge, attitudes and practices (KAP) around COVID-19. The data were collected from more than 300,000 people in 67 countries who chose to participate in a survey promoted on Facebook. Researchers from MIT collected the data and Johns Hopkins CCP analyzed and presented the data on an easy-to-use COVID dashboards.
19-22 October 2020: WHO is participating in PRovoke’s ninth Global Public Relations Summit, which examines the communications turbulence that has swept the world this year, including disease infodemics during emergencies.

24-28 October 2020: WHO will participate in a panel to explore the challenges of the COVID-19 infodemic in a post-digital era. The session will cover the dangerous aspects of the COVID-19 infodemic, and how to address it by promoting digital advocacy, science and evidence-based information.

27-29 October 2020: WHO will participate on a panel focused on investigating the potential impact of mis-and disinformation on COVID-19 vaccine uptake. This session will explore how infodemics interact with the pandemic in shaping attitudes towards acceptance and uptake of hoped-for, potential game-changing, vaccines.

RECENT EVENTS

14-16 October 2020: WHO participated in the Canadian
Public Health Association's 2020 public health forum to create awareness among health workers, health-related institutions and the general public about the importance of understanding their role in fighting the infodemic.

13-17 October 2020: WHO participated in the virtual G20 Interfaith Forum Saudi Arabia to discuss how faith communities can build partnerships to address COVID-19.

13-14 October 2020: WHO participated in the Royal Society of Tropical Medicine & Hygiene annual meeting on emerging diseases and outbreaks.

13 October 2020: This WHO EPI-WIN webinar highlighted approaches to good participatory practices for COVID-19 research and response, providing practical examples of how these methods work to engage and empower communities through their involvement.
12 October 2020: As part of the EPI-WIN webinar series, WHO hosted a conversation about the importance of empathy and community-based solutions to mental health challenges, including grief and digital wellbeing in the context of COVID-19 and beyond.

7 October 2020: The European Broadcasting Union hosted an event where WHO discussed the media's role on combatting COVID-19 misinformation.

WHAT WE'RE READING

If you're feeling overwhelmed by the abundance of new research being published on infodemic management, it just means you're human. Take a look here. We've selected a few interesting articles that you can read on your daily commute to your... home office.

ABOUT THE NEWS FLASH

An infodemic is an overabundance of information—some accurate, some not—that spreads alongside a disease outbreak. Infodemics are nothing new, but in the digital age, they spread in real time and create a breeding ground for uncertainty. Uncertainty fuels skepticism and distrust, which is a perfect environment for fear, anxiety, finger-pointing, stigma, violent aggression and dismissal of proven public health measures. To manage an infodemic, we need to understand what contributes to it. So that’s why we’re sending you these updates. In each issue of the WHO’s Infodemic Management News Flash we’ll share the latest work happening at the global level, as well as highlight some of the challenges and solutions with infodemics in local contexts. We’ll also provide you with a few takeaways to help you be an effective infodemic manager in your daily life.

If you have a tip on infodemic management or an idea for a future News Flash, email us at infodemicmanagement@who.int. Thanks for joining us on this journey.
