## **Joint FAO/WHO Expert Committee on Food Additives (JECFA)**

### **WHO Roster of Toxicological and Epidemiological Experts 2026 – 2030**

This roster consists of scientific experts who have either submitted applications in response to the call for experts or are members of the WHO Expert Panel on Food Safety. The applications were reviewed by the WHO Secretariat and by an external referee, and selections made based on the criteria outlined in the call for experts. Scientists of the roster will be considered for future meetings of JECFA according to expertise required for the respective meetings. Inclusion in the roster does not guarantee such participation.

Before participating in meetings, selected experts will be required to declare any potential interests associated with the substances under consideration through completion of the standard WHO declaration of interest form.

When making selections for individual meetings a balance of scientific expertise, gender and geographical representation will be considered. The roster is dynamic and WHO encourages applications from unrepresented and underrepresented countries, people with disabilities, younger applicants and women.

Experts are placed on it for an initial period of five years (2026 - 2030) or until their terms on the WHO Expert Panel on Food Safety expire, and new experts are added based on consideration of new applications and specific expertise required for a meeting.

JECFA is tasked with the evaluation of food additives, contaminants and natural toxins in food, as well as veterinary drug residues. Key areas of expertise related to these work areas are listed for each expert.

For detailed information on JECFA please refer to the website:
