Mental Health Resources

Table of Contents

- Age-standardized suicide rate (per 100 000)
- Beds for mental health in general hospitals, per 100,000
- Beds in community residential facilities, per 100,000
- Beds in mental hospitals, per 100,000
- Community residential facilities, per 100,000
- Government expenditures on mental health as a percentage of total government expenditures on health, in %
- Government expenditures on mental hospitals as a percentage of total government expenditures on mental health, in %
- Mental health day treatment facilities, per 100,000
- Mental health legislation
- Mental health outpatient facilities, per 100,000
- Mental health plan
- Mental health policy
- Mental hospitals, per 100,000
- Nurses working in mental health sector, per 100,000
- Psychiatrists working in mental health sector, per 100,000
- Psychologists working in mental health sector, per 100,000
- Social workers working in mental health sector, per 100,000

Age-standardized suicide rate (per 100 000)

Indicator ID	4446
Indicator name	Age-standardized suicide rate (per 100 000)
Name abbreviated	Suicide rate
Data Type Representation	Rate
Topic	
ISO Health Indicators Framework	
Rationale	
Definition	Number of suicides in a country in a year, divided by the population and multiplied with 100 000.
Associated terms	
Preferred data sources	
Other possible data sources	
Method of measurement	
Method of estimation	WHO Global Health Estimates for the year 2012. These estimates represent the best estimates of WHO, computed using standard categories, definitions and methods to ensure cross-country comparability, and may not be the same as official national estimates. The estimates are rounded to the appropriate number of significant figures. Standardized to the WHO World Standard Population.

Beds for mental health in general hospitals, per 100,000

Indicator ID	2962
Indicator name	Beds for mental health in general hospitals, per 100,000
Name abbreviated	Beds general hospitals
Data Type Representation	Rate
Topic	
ISO Health Indicators Framework	
Rationale	
Definition	Mental health beds in general hospitals per 100,000 population
Associated terms	
Preferred data sources	
Other possible data sources	
Method of measurement	WHO survey
Method of estimation	WHO survey - unadjusted

Beds in community residential facilities, per 100,000

Indicator ID	2964
Indicator name	Beds in community residential facilities, per 100,000
Name abbreviated	Beds community
Data Type Representation	Rate
Topic	
ISO Health Indicators Framework	
Rationale	
Definition	Beds in community residential facilities per 100,000 population
Associated terms	
Preferred data sources	
Other possible data sources	
Method of measurement	WHO survey
Method of estimation	WHO survey - unadjusted

Community residential facilities, per 100,000

Indicator ID	2963
Indicator name	Community residential facilities, per 100,000
Name abbreviated	Community residential facilities
Data Type Representation	Rate
Topic	
ISO Health Indicators Framework	
Rationale	
Definition	Community residential facilities per 100,000 population
Associated terms	
Preferred data sources	
Other possible data sources	
Method of measurement	
Method of estimation	WHO survey - unadjusted

Government expenditures on mental health as a percentage of total government expenditures on health, in %

Indicator ID	2953
Indicator name	Government expenditures on mental health as a percentage of total government expenditures on health, in %
Name abbreviated	Expenditures for mental health
Data Type Representation	Percent
Topic	
ISO Health Indicators Framework	
Rationale	
Definition	Expenditures on mental health means the government expenditures on mental health as a percentage of total government expenditures on health. Nominator: Mental health expenditures (in local currency) / Denominator: Total health expenditures (in local currency) x 100
Associated terms	
Preferred data sources	
Other possible data sources	
Method of measurement	WHO survey
Method of estimation	WHO survey - unadjusted

Mental health outpatient facilities, per 100,000

Indicator ID	2952
Indicator name	Mental health outpatient facilities, per 100,000
Name abbreviated	Mental health outpatient facilities
Data Type Representation	Rate
Topic	
ISO Health Indicators Framework	
Rationale	
Definition	Mental health outpatient facilities per 100,000 population
Associated terms	
Preferred data sources	
Other possible data sources	
Method of measurement	WHO survey
Method of estimation	WHO survey - unadjusted

Mental health plan

Indicator ID	2951
Indicator name	Mental health plan
Name abbreviated	Mental health plan
Data Type Representation	Categorical
Topic	
ISO Health Indicators Framework	
Rationale	
Definition	Existence of a mental health plan. A mental health plan is a detailed preformulated scheme for implementing strategies for the promotion of mental health, the prevention of mental disorders, and treatment and rehabilitation. It details the strategies and activities that will be implemented to realize the objectives of the policy. It also specifies other crucial elements such as the budget and timeframe for implementing strategies and activities and specific targets that will be met. The plan also clarifies the roles of the different stakeholders in implementing the activities of the mental health plan. For the purposes of this questionnaire, mental health programmes are included. A mental health programme is a targeted intervention, usually short-term, with a highly focused objective for the promotion of mental health, the prevention of mental disorders, and treatment and rehabilitation.
