Template 1.5. Stakeholder mapping table

Name of stakeholder	Role	Interest	Influence
e.g. Minister of Health			
e.g. Director of Policy and Planning, MOH			
e.g. Directors of health programmes			

Stakeholders can be grouped based on: interest group politics, bureaucratic politics, budget/finance politics, leadership politics, beneficiary politics, and external actors politics. See Reich and Campos (2019) for more guidance (Campos and Reich, 2019).

The interest and influence columns are with respect to the stakeholder's interest and influence in terms of addressing cross-programmatic inefficiencies through integration, or other measures aimed at reducing fragmentation and overlaps across programs.
