HIV drug resistance prevention and response in light of the WHO HIV Drug Resistance Report 2021

Stopping AMR, including resistance to medicines use to treat and prevent HIV infection, is a global priority requiring coordinated action across all governmental sectors and levels of society.

Join WHO's **Dr Meg Doherty** and **Dr Haileyesus Getahun** for this informative session on **24 November, 13:00-14:30 CET** to hear from:

Irene Mukui, Drugs for Neglected Diseases Initiative
Michael Jordan, World Health Organization
Juliana Da Silva, US Centers for Disease Control and Prevention
Pablo Rojo, Complutense University
Ana Claudia Naldinho, Médecins Sans Frontières
Collins Otieno, African Society for Laboratory Medicine
Mandisa Dukashe, HIV Survivors and Partners Network
Moses "Supercharger" Nsubuga, Uganda's voice of HIV drug resistance awareness
