Data management & data cleaning

Zeleke Alebachew
Survey coordinator
Data Management

Data Management unit  HR

• Data manager appointed starting from June 2010.
• Two clerk recruited
• One IT manager assist the data manager
• One adviser assist the data manager
• Final Cespro database created for data entry in September 2010
• Each cluster of field data entered by clerk within a week after reception and batch editing done by data manager.

• Central result (laboratory and x-ray) entered by data manager, IT manager assistant some times clerk with supervision.
challenges

- unable to operate more than one people at a time on the combined data base
- After 50 % of data entry made the data become huge and slow down the speed of data entry and editing of the combined database.
- Some variables output could not generate easily, there is a need to use the Cespro program before exporting to SPSS.
Thank you
