

#ENDTB WEBINAR

LAUNCH OF WHO CONSENSUS STATEMENT AND CALL TO ACTION ON TB AND PREGNANCY

**Thursday, 30 October 2025
13h00 to 15h00 CET**

The World Health Organization (WHO) is organizing a global webinar to launch the newly released consensus statement and accompanying call to action on optimal and early inclusion of pregnant and lactating women in tuberculosis research.

Despite having an increased risk of developing tuberculosis (TB) and the adverse maternal and perinatal outcomes associated with TB, pregnant and lactating women have largely been excluded from TB clinical trials. The webinar will spotlight approaches to advance the earlier and optimal inclusion of pregnant and lactating women in TB research.

The event is open to anyone with an interest in ending TB in pregnant and lactating women.
