UN GENERAL ASSEMBLY SIDE EVENT

PROGRESS AND MULTISECTORAL ACTION TOWARDS ACHIEVING GLOBAL TARGETS TO END TB

SEPTEMBER 20, 2022

13:00H – 15:00H EDT

Venue: Harvard Club of New York City, 35 West 44th Street, New York, NY 10036

Join us for a special UN General Assembly high-level side event: “Progress and multisectoral action toward achieving global targets to end TB”. The side event is co-organized by the Government of Indonesia and the World Health Organization.

The event will bring together Heads of State, Ministers of Health and other ministries, Heads of Agencies, partners and civil society, to discuss, progress towards global targets, ongoing efforts to advance multisectoral action and accountability, and preparations for the 2023 UN High Level Meeting on TB. As Indonesia holds the 2022 G20 Presidency, a spotlight will be placed on G20 leadership on ending TB, building on the outcomes of the first G20 Health Working Group side event on TB “Call to Action on financing the TB response”. A focus will also be placed on intensifying TB research and development, notably for new TB vaccines leveraging lessons from the response to the COVID-19 pandemic.
