ABOUT THE EVENT

Join us on the sidelines of the 77th World Health Assembly to discuss how we can join forces to accelerate the TB response and make progress towards the targets and commitments pledged by Heads of State at the 2023 UN High Level Meeting on TB.

2024 is a pivotal year for the fight to end TB, with the focus shifting to turning high level commitments into tangible actions to benefit the millions who face loss of life and suffering from the preventable and curable disease. TB remains one of the world’s leading infectious killers.

The event will take stock of the progress made, and challenges encountered towards reaching the commitments made at the 2023 UN High Level Meeting on TB and outline key actions and innovations to rapidly ramp up the TB response.

The main speakers will include Ministers, ambassadors, and other high-level government representatives, WHO leadership, Heads of Agencies, TB survivors, civil society, and partners.

This event is being organized by the Ministry of Health of the Republic of Poland with the technical support of the World Health Organization.

WEDNESDAY, 29 MAY 2024 | 08:00 - 10:00 CEST
BREAKFAST WILL BE SERVED FROM 07:30H
