^{*2003-2009, 2010-2014, 2015-2019} and 2020-2024 total figures. Breakdowns by year available on subsequent tables.

WHO reports only laboratory-confirmed cases. All dates refer to onset of illness.

Source: WHO/GIP, data in HQ as of 19 December 2025.

^{**} For the United States of America, in 2024, cases reported as A(H5) are included here.

[†]This count includes reported detections in asymptomatic individuals. In some cases, the confirmation of infection versus transient contamination of the nasopharynx/oropharynx with virus particles after exposure to infected birds or contaminated environment remains inconclusive. Total number of cases includes number of deaths. Counts are according to reporting country which may differ from country where exposure may have occurred.
