Global mandate for strengthening

Emergency, Critical and Operative (ECO) care

- Impact over half of all deaths in low and middle income countries
- Help governments to progress towards 10 SDG targets
- Are essential for preparedness for and response to emergencies
- Ensure timely and targeted action to provide people the care they need
- Meet people's health needs and integral to the primary health care approach

The 76th World Health Assembly passed resolution 76.2 to globally strengthen the planning and provision of integrated ECO care as part of universal health coverage, to meet population health needs, improve health system resilience and ensure protection from health emergencies.
