

TERMS OF REFERENCE

Initiator: WHO Country Office

Department:.....

1. Purpose of the Consultancy or AWP (whichever is applicable)

The purpose of this contract is to conduct baseline assessment on injection safety using WHO Tool C Revised after necessary modifications and pilot testing. The assessment will be a survey which has to be implemented according to the required methodology and in line with international standards in order to produce injection safety baseline data.

2. Consultant's Name

.....

3. Background

For more than 15 years, WHO and its partners have developed and implemented strategies for reducing unnecessary injections worldwide and for making them safer including the launch and maintenance of a very active Safe Injection Global Network (SIGN). Major progress has been achieved especially in the field of immunization but there still remains significant work to be accomplished considering that, about 95% of injections is performed for therapeutic purposes. To strengthen and focus efforts on IS, in 2015 WHO has launched a new global policy which recommends the use of pre-qualified (by WHO or other recognized bodies) safety engineered injection devices in therapeutic services, highlights the importance of strengthening and sustaining past efforts in immunization services, and encourages reducing unnecessary injections for therapeutic use, when there is a suitable alternative formulation available. Based on the new policy as a cornerstone, WHO launched a global injection safety campaign in order to promote adoption and implementation of the policy at country level, and a related country implementation strategy to be pilot-tested in three countries. India, Uganda and Egypt are the three pilot countries.

4. Work to be performed

Output 1: Injection safety assessment in Punjab	Deliverable 1.1: Detailed report based on the guidance document and report pattern described in Tool C
Output 2: Training and survey monitoring detail	Deliverable 2.1: A concise reporting describing the details of training and how field work was monitored
Output 3: Hard copy of questionnaires	Deliverable 3.1: All edited and final copies of the questionnaires to be submitted to WHO India Country Office
Output 4: Electronic data	Deliverable 4.1: Clean electronic data of the survey to be submitted to WHO Country Office in a software which will be decided after mutual agreement

5. Supervision

The contracted individual or organization will work under the supervision of designated expert nominated by WHO Country Office.

6. Timelines

7. Specific Requirements

Experience Required	The individual or organization should have experience of conducting research surveys, mobilizing field teams and managing data of research
Skills Required	Ability to produce high quality report
Language	English and applicable local language

8. Place of assignment
