

Abbreviated Biosketch for Proposed Members of the Guideline Development Group

Title:	Dr
First name:	Dennis
Last name:	Massue
Current position:	Technical Advisor – Public Health and Malaria Control
Affiliation*:	International SOS
Country:	Indonesia

Dr Dennis Massue is an experienced public health specialist at International SOS focusing on the control, prevention, and surveillance of vector-borne diseases, particularly malaria. He has more than 14 years of research and field experience in several African and Southeast Asian countries. Dr Massue has excellent technical advisory, project management, and capacity building skills and has delivered impactful results in strengthening national malaria control programs. Previously, Dr Massue worked as a Senior Research Scientist at the National Institute for Medical Research Tanzania, where he led large multi-partner research projects on insecticide resistance and mosquito net durability funded by major global health donors. His extensive research experience in the field of insecticide resistance surveillance and evaluation of vector control tools such as LLINs has helped provide important insights for malaria control policies and strategies.

Dr Massue maintains a broad network of collaborators nationally and internationally. Dr Massue has authored several peer-reviewed publications. He also lectures and supervises students at University of Dar es Salaam in Tanzania.

Dr Massue holds a PhD in Epidemiology and Public Health from the Swiss Tropical and Public Health Institute in Switzerland, an MSc in Biology and Control of Parasites and Disease Vectors from the Liverpool School of Tropical Medicine in the United Kingdom and a Doctor of Veterinary Medicine from the Sokoine University of Agriculture in Tanzania.
