

Abbreviated Biosketch for Proposed Members of the Guideline Development Group

Title:	Dr.
First name:	Terrie
Last name:	Taylor
Current position:	Professor
Affiliation*:	Department of Osteopathic Medical Specialties, College of Osteopathic Medicine, Michigan State University, East Lansing MI
Country:	USA
<p>Bio:</p> <p>I have been living and working in Malawi for six straight months each year (January – June, the “malaria season”) since 1986. Our focus has been on the pathogenesis of cerebral malaria. We provide clinical care for children with cerebral malaria and, in that context, study the disease. This has included conducting 4 interventional clinical trials, recognizing malarial retinopathy and establishing its importance, orchestrating the largest single autopsy study of fatal cerebral malaria, and coordinating the introduction of magnetic resonance imaging in Malawi.</p> <p>Since 2010, I have also served as the Program Director for the Malawi ICEMR (International Centers of Excellence in Malaria Research). With ICEMR support, we have established the capacity for entomological field work in Malawi, executed a series of cross-sectional surveys, carried out inpatient and outpatient facility-based surveillance, and are currently conducting 4 longitudinal cohort studies, one case-control study and a qualitative inquiry into barriers thwarting malaria control.</p> <p>I am currently serving as an advisor to Novartis (Malaria Advisory Board, Institute for Tropical Diseases Strategic Advisory Board) and as a DSMC member for a Phase 2a antimalarial drug.</p>
