

Abbreviated Biosketch for Proposed Members of the Guideline Development Group

Title:	Dr.
First name:	Joshua
Last name:	Yukich
Current position:	Associate Professor
Affiliation*:	Tulane University School of Public Health and Tropical Medicine
Country:	USA
<p>Bio:</p> <p>I am currently an associate professor at the Tulane University School of Public Health and Tropical Medicine in New Orleans, LA. I am also a member of the editorial working group. My research focuses on methods for preventing and eliminating vector borne disease mainly in sub-Saharan Africa, primarily malaria. I have training in epidemiology, public health and health economics, and much of my work has centered on the synergy of these topics. Much of my research has been on the application of economic evaluation techniques to determine the most efficient use of resources for vector control programs for malaria, leishmaniasis, and other neglected tropical diseases. I have interest in the application of economic, epidemiological and ecological methods to the surveillance of vector borne infectious disease control programs. I earned my PhD at the Swiss Tropical Institute and have worked in various positions at Tulane University since that time. I have also served as a technical advisor to WHO-EMRO as well as a member of the Vector Control Technical Expert Group for the WHO.</p>
