F9053N/55 model is oval-shaped electrodes, 30x23mm dimensions, equipped with 55cm long wire and 4mm socket, pre-gelled and it can be easily connected to the ECG monitor, avoiding pressure on the skin. The external layer in waterproof medical grade PE foam protects the skin beneath the electrode from air and contaminating fluids.

					Disposable ECG electrodes, oval-shaped 50x48mm dimensions,Silver/Silver Chloride(SSC) sensor and stainless steel snap. F9060/5 model is suitable for rest, long term, stress or Holter ECG recording, with a direct application onto the skin. The SSC sensor permits a reliable and stable recording. The external layer in waterproof medical grade PE foam protects the skin beneath the electrode from air and contaminating fluids

					Sperm vitality test The hypo-osmotic swelling test is a sperm vitality test based on the principle that live spermatozoa swell due to the absorption of a hypo-osmotic solution. The HOS test is based on the test procedure described in the WHO laboratory manual for the examination of human semen and sperm-cervical mucus interaction. For more information, visit the FertiPro website: www.fertipro.com

The STERIZONE® VP4 Sterilizer currently offers a single preset sterilization cycle (Cycle 1) designed for the sterilization of a wide variety of loads consisting of general instruments, single, double or multi-channel flexible endoscopes, and rigid and semi-rigid channeled devices including single channel and double channel rigid endoscopes. The STERIZONE® VP4 Sterilizer uses dual sterilants, vaporized hydrogen peroxide (H2O2) and ozone (O3), in a multiphase process, and is the only dual-sterilant sterilizer cleared for

					The Integra Camino ICP Monitor is a compact, portable device that provides tools for continuously determining and monitoring intracranial pressure (ICP) and intracranial temperature (ICT) directly in the brain, depending on which catheters are connected to the system. This monitor supports Integra Camino Fiber Optic Catheters for measuring both ICP and temperature, and Integra Camino Flex Catheter for measuring ICP values.

					ANEROID SPHYGMOMANOMETER is a manual non-invasive aneroid sphygmomanometer which respectively uses an inflation cuff wrapped around the upper arm. The cuff is inflated and deflated by a manual inflation bulb. Besides a manometer (Aneroid gauge), the accessories include additional stethoscope. It is conjunction with Stethoscope when use.

06430056480008	Megin Oy	NM23900N		ELEKTA NEUROMAG TRIUX	The Elekta Neuromag® TRIUX non-invasively measures the magnetoencephalographic (MEG) signals (and, optionally, electroencephalographic (EEG) signals) produced by electrically active tissue of the brain. These signals are recorded by a computerized data acquisition system, displayed, and may then be interpreted by trained physicians to help localize these active areas. The locations may then be correlated with anatomical information of the brain. MEG is routinely used to	ELEKTA OY	NM23900N	ELEKTA NEUROMAG® TRIUX	11467-Electroencephalograph	Z12100302-ELECTROENCEPHALOGRAPHS	18332-Magnetoencephalographs	42182308-Electroencephalograph EEGs

				DSK-1011 is an upper arm type blood pressure monitor. This product is intended for noninvasive measurement of systolic and diastolic blood pressure and pulse rate as well as calculation of pulse pressure in adults in a home healthcare environment. The product is not designed for neonatal use. Measurement is performed during the inflation of the cuff. The cuff is automatically inflated rapidly at the initial phase then gradually afterwards. The masurement ends as the systolic blood pressure is	NIHON SEIMITSU SOKKI CO.,LTD. 05411967000043	Fertipro NV	VITAL		VITALSCREEN	VitalScreen is an in vitro diagnostic kit for the semi-quantitative determination of human sperm vitality by dye exclusion. The kit consist of 20ml of 1% Eosin Y in saline (product code: VITAL_1 and 30ml of 5% Nigrosin in saline (product code: VITAL_2). The eosin-nigrosin staining technique is based on the principle that dead cells will take up the eosin and as a result stain red. The nigrosin provides a dark background which makes it easier to assess the slides. The VitalScreen™ is based on the test procedure described in the WHO	FERTIPRO	VITAL	VITALSCREEN	43587-Biological stain IVD	W0103010301-HISTO / CYTO STAINS	17027-IVD Test Reagents Kits	41116121-Hematology reagents or solutions or stains

					CAREvent ALS hand held automatic resuscitator is pneumatically powered, time/volume cycled ventilatlatory resuscitator. It provides trained individuals with a safe and effective means of providing artificial ventilation during respiratory and cardiac arrest. The CAREvent ALS delivers automatic ventilation with controlled flow rates, airway pressure, tidal volume and frequencies. Patients are protected from over inflation and potential barotraumas by an audible Pressure Relief System. In CAREvent ATV+ is pneumatically powered, time/volume cycled, intermittent positive pressure patient ventilators specifically designed for use by trained personnel in the pre-hospital, hospital, interhospital and air ambulance environments. It has independent controls for minute volume and frequency that provide a comprehensive range of 12 ventilation frequencies and 12 minute-volume settings. This provides a possible 144 combinations of delivered tidal volume and respiratory rate. The various modes of

					CATHETER PORTNOY VENTRICULAR STRIPED							
					The Portnoy Ventricular Catheter is designed for shunting cerebrospinal fluid (CSF) from the ventricles of the brain. This silicone elastomer catheter employs silicone elastomer flanges near the proximal tip to help reduce the possibility of obstruction of the drainage holes during insertion and resultant occlusion of the catheter. The Portnoy Ventricular Catheter has seven flanges. During insertion, these flanges tend to fold back in a closed-

					The Integra Pudenz Ventricular Catheter is designed for shunting cerebrospinal fluid (CSF) from the ventricles of the brain. The catheter is manufactured from a high durometer silicone elastomer, which helps resist kinking and occlusion caused by the bending or twisting of the catheter. A stripe, made of barium sulfate impregnated silicone elastomer is imbedded in the wall of the catheter. The stripe provides a catheter which is radiopaque throughout its entire

The external portion of the catheter may be secured to the scalp by the suture collar. The Hermetic Ventricular Catheter is designed for diverting fluid from the ventricles through a series of drainage holes near the catheter tip. The catheter can be inserted into the ventricular cavity with the stainless steel style. A trocar is supplied with the catheter to facility subcutaneous tunneling away from the burr hole. The external portion of the catheter may be secured to the scalp by the suture collar.	INTEGRA LIFESCIENCES CORP. 					Mechanical column scale with eye-level beam. With a capacity of 220 kg, this mechanical column scale is the ideal solution for weighing even overweight persons. This is due partly to the generously proportioned, low platform. The scale is printed on both sides to allow both the patient and the user behind the scale to read the weight. The high-quality base is made of cast iron and the column from steel, guaranteeing not only firm footing, but also a long service life. The column scale can also optionally be fitted with a

04012030008952	seca GmbH & Co. KG	213	2131821009	SECA 213	At only 2.4 kg, the seca 213 mobile stadiometer is especially suitable for use in the field but also ideal for doctors' practices and pediatric hospitals. The measuring rod can be dismantled into several pieces and set up easily and quickly. The spacer keeps the rod straight and stable without any fittings. As the scale is printed along the side of the measuring rod, it is easy to read off the result while measuring, thus guaranteeing precise results.	SECA GMBH & CO.
