Global status report on 4. overview

Global dementia action plan

Dementia as a public health priority

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Target 2.75% in 2025

Global status report on 4. overview

Global dementia action plan

Dementia as a public health priority

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.

Diagnosis, treatment, care and support

Risk reduction

Awareness

Stakeholders across all action areas if we renew, coordinated efforts by all. The report clearly shows that we need urgent action to ensure that dementia response to public health.
Diagnosis, treatment and care

- CURRENT PROGRESS: <50% of WHO Member States reach at least 50% diagnostic rate by 2025.

Support for dementia carers

- CURRENT PROGRESS: 76% of informal care is provided by women.

Health information systems

- CURRENT PROGRESS: Health information systems are imperative to increase countries' capacity to maintain health information systems for dementia and monitor core indicators vital to guide evidence-based actions and monitor progress over time.

Research and innovation

- CURRENT PROGRESS: The output of global research on dementia doubles between 2017 and 2025.
