**Subject:** [EXT] comments from NCNCD, China CDC

Suggestions for the *WHO Discussion Paper (version dated 8 June 2022)-Draft Updated Appendix 3 of the WHO Global NCD action plan 2013-2030*

1. For CR5: Influenza vaccination for patients with chronic obstructive pulmonary disease:

Please consider adding pneumococcal vaccination and expanding the population to those at high risk of chronic respiratory diseases.

2. Under Objective 6: To monitor the trends and determinants of NCDs and evaluate progress in their prevention and control, the 3rd action: Establish and or strengthen a comprehensive noncommunicable disease surveillance system, including reliable registration of deaths by cause, cancer registration, periodic data collection on risk factors and monitoring national response

The system should also cover major NCDs, like CVD, COPD, and diabetes, not just limited to death, cancer, and risk factors.

Thank you.

The Academic Committee of the National Center for NCD Control and Prevention, Chinese Center for Disease Control and Prevention
