Subject: [EXT] Denmark: General comment to the proposed updated Appendix 3 under the WHO Global Action Plan on NCDs

To whom it may concern,

Please find a general comment from Denmark regarding the proposed updated Appendix 3 under the WHO Global Action Plan on NCDs:

- Denmark strongly supports the important role of the WHO in securing a strong focus on evidence-based recommendations on the prevention and control of NCDs and supporting Member States in identifying relevant national interventions. Regarding 'Unhealthy diets', Denmark is already working on many of the proposed interventions, whilst combining a focus on promoting both healthy, climate-friendly and sustainable diets. WHO could consider mentioning that healthy and sustainable diets go hand in hand, and that a focus on promoting not only healthy but also sustainable diets (diets from sustainable food systems) is necessary for the promotion of health and prevention of NCDs in the long term.

Sincerely,

Marie C. Vermund
