

GYTS Objectives

The Global Youth Tobacco Survey (GYTS), a component of the Global Tobacco Surveillance System (GTSS), is a global standard for systematically monitoring youth tobacco use and tracking key tobacco control indicators.

GYTS is a cross-sectional, nationally representative school-based survey of students in grades associated with ages 13 to 15 years. GYTS uses a standard core questionnaire, sample design, and data collection protocol. It assists countries in fulfilling their obligations under the World Health Organization (WHO) Framework Convention on Tobacco Control (FCTC) to generate comparable data within and across countries. WHO has developed MPOWER, a technical package of selected demand reduction measures contained in the WHO FCTC:

GYTS Methodology

GYTS uses a global standardized methodology that includes a two-stage sample design with schools selected with a probability proportional to enrollment size. The classes within selected schools are chosen randomly and all students in selected classes are eligible to participate in the survey. The survey uses a standard core questionnaire with a set of optional questions that countries can adapt to measure and track key tobacco control indicators. The questionnaire covers the following topics: tobacco use (smoking and smokeless), cessation, secondhand smoke (SHS), pro- and anti-tobacco advertising and promotion, access to and availability of tobacco products, and knowledge and attitudes regarding tobacco use. The questionnaire is self-administered; using scannable paper-based bubble sheets, it is anonymous to ensure confidentiality.

In Benin, GYTS was conducted in 2024 under the coordination of the Ministry of Health. The overall response rate was 91.2%. A total of 5,223 eligible students in grades 4eme, 3eme, and 2nde completed the survey, of which 3,083 were aged 13-15 years. Data are reported for students aged 13-15 years.

GYTS Highlights

TOBACCO USE

- 7.3% of students, 9.2% of boys, and 5.0% of girls currently used any tobacco products.
- 4.6% of students, 5.9% of boys, and 3.3% of girls currently smoked tobacco.
- 2.4% of students, 3.6% of boys, and 1.2% of girls currently smoked cigarettes.
- 3.1% of students, 3.7% of boys, and 2.1% of girls currently used smokeless tobacco.

ELECTRONIC CIGARETTES

- 1.7% of students, 2.1% of boys, and 1.2% of girls currently used electronic cigarettes.

CESSATION

- More than 7 in 10 (72.6%) students who currently smoked tobacco tried to stop smoking in the past 12 months.
- Almost 7 in 10 (65.0%) students who currently smoked tobacco wanted to stop smoking now.

SECONDHAND SMOKE

- 23.3% of students were exposed to tobacco smoke at home.
- 33.6% of students were exposed to tobacco smoke inside enclosed public places.

ACCESS & AVAILABILITY

- 30.1% of students who currently smoked cigarettes bought cigarettes from a store, shop, supermarket, street vendor, or kiosk.
- Among students who currently smoked cigarettes who tried to buy cigarettes, 68.9% were not prevented from buying them because of their age.

ADVERTISING & PROMOTION

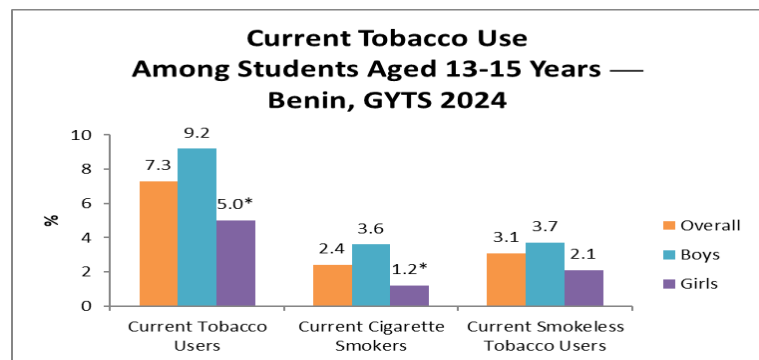

- More than 6 in 10 (63.5%) students noticed anti-tobacco messages in the media.
- Almost 3 in 10 (29.9%) students noticed tobacco advertisements or promotions when visiting points of sale.
- More than 1 in 10 (10.2%) students had something with a tobacco brand logo on it.

KNOWLEDGE & ATTITUDES

- 64.1% of students definitely thought other people's tobacco smoking is harmful to them.
- 84.4% of students favored prohibiting smoking inside enclosed public places.

TOBACCO USE

ANY TOBACCO USE (smoked and/or smokeless)	OVERALL (%)	BOYS (%)	GIRLS (%)
Current tobacco users ¹	7.3	9.2	5.0*
Ever tobacco users ²	24.9	29.5	19.9*
SMOKED TOBACCO			
Current tobacco smokers ³	4.6	5.9	3.3*
Current cigarette smokers ⁴	2.4	3.6	1.2*
Frequent cigarette smokers ⁵	0.2	0.2	0.1
Current smokers of other tobacco ⁶	2.7	3.2	2.2
Ever tobacco smokers ⁷	20.5	25.0	15.6*
Ever cigarette smokers ⁸	17.4	21.4	13.0*
