

Thematic Working Group on NCDs and the Environment

Action plan for 2019

- Develop standard operating procedures for joint programming missions of the Task Force on air pollution and NCDs.
- Undertake two HECCC/UNIATF joint programming missions that focus on air pollution/environmental determinants and health.
- Mapping existing networks (NGOs, medical societies, countries, cities etc) and agreements that are working towards reducing air pollution levels in order to determine how the UN system as a whole can contribute to ongoing efforts.
- Build the methodology for undertaking NCD/pollution investment cases (building on NCD investment case work done to date) – and then undertake 1-2 investment cases.
- Mobilise resources for the above.
