LEGEND

The figure displays a time series of COVID-19 cases in Nepal, specifically focusing on the central and eastern regions. The maps are arranged in a 3x4 grid, with the last cell containing a legend and a locator map of Nepal.

Legend:

- 0
- 50 and below
- 51 - 500
- 501 - 1000
- 1001 - 5000
- 5001 and above

Week 21: Most districts show low case counts (0 to 500), with some districts in the central region showing counts between 1001 and 5000.

Week 22: The distribution remains similar to Week 21, with a few districts showing higher case counts.

Week 23: There is a noticeable increase in case counts across several districts, particularly in the central region, with some reaching 5001 or more.

Week 24: The pattern continues, with a concentration of higher case counts in the central and eastern districts.

Week 25: The number of districts with case counts between 1001 and 5000 increases, and some districts in the central region reach 5001 or more.

Week 26: The distribution shows a further increase in case counts, with more districts reaching the 5001 and above category.

Week 27: The central region shows a significant increase in case counts, with several districts reaching 5001 or more.

Week 28: The pattern of high case counts in the central region persists, with some districts reaching 5001 or more.

Week 29: The distribution remains similar to Week 28, with a concentration of higher case counts in the central and eastern districts.

Week 30: The pattern continues, with a concentration of higher case counts in the central and eastern districts.
