Situation Update #112 - Coronavirus Disease 2019 (COVID-19)
WHO Country Office for Nepal

Reporting Date: 30 May - 05 June 2022 (EPI Week 22)

HIGHLIGHTS
(Data published in the MoHP Situation Report as of 05 June 2022 and same data published in EDCD Report as of 06 June 2022)

- Of the total RT-PCR confirmed COVID-19 cases, 98.77% (967,167) of cases have recovered, 0.01% (110) are active cases and 1.22% (11,952) are deaths.
- Among the total active cases, 99.1% (109) cases are in home isolation; 0.9% (1) of cases are undergoing hospital/institutional isolation. None of the active cases require ICU admission or ventilator support.
- None of the districts reported more than 500 active cases.
- Among the new RT-PCR confirmed cases (72) reported this week, 70.8% (51) are from Kathmandu district followed by Dhanusha district 5.6% (4). Majority of the new cases 75.0% (54) have been reported from Kathmandu Valley (Kathmandu, Lalitpur and Bhaktapur), Bagmati Province.
- COVID-19 vaccination coverage status (as of 06 Jun 2022)

NEPAL EPIDEMIOLOGICAL SITUATION

- Since 9 May 2021, all 7 provinces in the country are experiencing community transmission.
- Since the start of the COVID-19 pandemic, 78.0% (764,222/979,199) of RT-PCR confirmed cases were reported from three provinces, namely- Province 1, Bagmati Province and Lumbini Province. The Kathmandu valley area (Kathmandu, Bhaktapur, Lalitpur) in Bagmati Province has substantially high case load with 43.7% of national total (428,006/979,199), and 81.2% of the provincial total (428,006/527,234).
- Province-wise RT-PCR test positivity rate in Epi Week 22 ranged from 0.0% (Province 1, Lumbini and Sudurpashchim province) to 4.1% (Madhesh province), with a national positivity rate at 0.4%. Karnali province did not report any test performed in the last week.
- Nepal reported a 22% increase in the number of new RT-PCR confirmed cases (n=72) in Epi week 22 compared to that in the previous week. Of these total cases reported last week, 85% of the cases have been reported from Province 1, Bagmati, and Lumbini province.
- Nepal did not report any death in Epi week 22 same as that in the previous week.

**National Influenza Surveillance**

- The teams of WHO and NPHL visited Provincial Public Health Laboratory (PPHL) (Lumbini Province) to attend “Implementation meeting of Integrated Influenza SARS CoV-2 Sentinel Surveillance in Nepal” on 1-2 June 2022. The Health Secretary, Ministry of Health, Population and Family Welfare of Lumbini Province chaired the meeting and representatives from Provincial Health Directorate and Lumbini Provincial Hospital attended the meeting.
- NIC-NPHL reported 5 Diagnostic Influenza sample on EPID-week 22 (30 May - 5 June 2022). All samples tested negative for both Influenza and SARS-CoV-2.
- This week WARUN (Walter Reed/ AFRIMS Research Unit Nepal) has provided result of influenza test done in the EPID-week 20 and 21. A total of 41 samples were tested for both Influenza and SARS-CoV-2. All the samples were tested negative for both Influenza and SARS-CoV-2.
- Out of the total SARS-CoV-2 samples that tested Negative at NPHL on EPID-week 22 (30 May - 5 June 2022), 42 SARS-CoV-2 Negative samples were tested for Influenza. None of the samples tested positive for Influenza.
- **From January 3rd, 2022 until June 5th, 2022:**
  - A total of 5 samples have tested positive for Influenza (2 Influenza B Positive and 3 Influenza A/H3) from 2352 samples (Sentinel and non-sentinel samples including SARS-CoV-2 Negative SARI and ILLI cases).
  - Similarly, 206 samples have tested positive for SARS-CoV-2 from 661 Influenza Negative samples (Sentinel/non-sentinel ILLI/SARI samples).

WHO SEAR countries: Number of COVID-19 confirmed cases and cumulative incidence rate (per 100,000). Link Here- [https://worldhealthorg.shinyapps.io/covid/](https://worldhealthorg.shinyapps.io/covid/)

---

1 These positive cases are included in the COVID-19 database.
Figure 1: RT-PCR confirmed COVID-19 cases and average number of COVID-19 cases over the last seven days, by date of onset/sample/confirmation (N=979,199) (Data reported on 05 June 2022 up to 19:00:00)

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020 (not shown here). Reference dates used in order of preference as available – Date onset/Date of sample collection/Date of confirmation. Clinical information presented here is collected on the day of sample collection.

At national level, the first wave of cases between July 2020 and February 2021 was followed by the second wave from the middle of March 2021. Since the middle of December 2021, a third wave of cases soared up exceeding the highest number of single day cases reported in the past surges towards the end of January 2022, however the trend has been decreasing since then.
Figure 2: Cumulative case count of RT-PCR confirmed COVID-19 cases (N=979,199) by province (Data reported on 05 June 2022 up to 19:00:00)

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020 (not shown here). Reference dates used in order of preference as available - Date onset/Date of sample collection/Date of confirmation.

The cumulative case incidence has been increasing in Nepal since the first case was confirmed on 23 January 2020. Cases have been largely reported from Bagmati Province followed by Province 1 and Lumbini Province.
There were 3 new cases reported in the past week in Province 1. Since a peak in week 3, cases are continuously decreasing. Cases have decreased by 50% in the past week compared to the previous week. There was no death reported in the past week, same as that in the previous week. The test positivity rate in Province 1 decreased to 0.0% in the past week. A total of 54 tests were performed in the past week, 58% less than that in the previous week.

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020 (not shown here). Reference dates used in order of preference as available - Date onset/Date of sample collection/Date of confirmation.
Situation Update #112 - Corona virus Disease 2019 (COVID-19)
WHO Country Office for Nepal
Friday 10 June 2022

Figure 3A2: RT-PCR confirmed COVID-19 cases in Madhesh Province: Trend of Cases, 7 days Rolling Average, Weekly Cases and Deaths and Test Positivity Rate (Data reported on 05 June 2022)

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020 (not shown here). Reference dates used in order of preference as available - Date onset/Date of sample collection/Date of confirmation.

There were 7 new cases reported in the past week in Madhesh province. Since a peak in week 3, cases are continuously decreasing. However, cases have increased by 75% in the past week compared to the previous week. There was no death reported in the past week, same as that in the previous week. The test positivity rate in Madhesh increased to 4.1% in the past week. A total of 49 tests were performed in the past week, 63% less than that in the previous week.
In Bagmati, 55 new cases were reported in the past week. Since a peak in week 3, cases are continuously decreasing. However, cases have increased by 41% in the past week compared to the previous week. There was no death reported in the past week, compared to 1 death in the previous week. The test positivity rate in Bagmati remained stable at 0.4% in the past week. A total of 15,725 tests were performed in the past week, 18% more than that in the previous week.
In Gandaki, 3 new cases were reported in the past week. Since a peak in week 4, cases are in a decreasing trend. Cases have decreased by 40% in the past week compared to the previous week. There was no death reported in the past week, same as that in the previous week. The test positivity rate in Gandaki decreased to 0.7% in the past week. A total of 135 tests were performed in the past week, 8% less than that in the previous week.
Situation Update #112 - Corona virus Disease 2019 (COVID-19)
WHO Country Office for Nepal
Friday 10 June 2022

Figure 3A5: RT-PCR confirmed COVID-19 cases in Lumbini Province: Trend of Cases, 7 days Rolling Average, Weekly Cases and Deaths and Test Positivity Rate (Data reported on 05 June 2022)

Lumbini reported 3 new cases in the past week. Since a peak in week 3, cases are continuously decreasing. However, cases have increased by 50% in the past week compared to the previous week. There was no death reported in the past week, same as that in the previous week. The test positivity rate in Lumbini remained stable at 0.0% in the past week. A total of 80 tests were performed in the past week, 41% less than that in the previous week.

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020 (not shown here). Reference dates used in order of preference as available – Date onset/Date of sample collection/Date of confirmation.
In Karnali, no new case was reported in the past week; there were no test performed. Since a peak in week 3, cases are continuously decreasing. Cases have decreased by 100% in the past week compared to the previous week. There was no death reported in the past week, same as that in the previous week. The test positivity rate in Karnali remained stable at 0.0% in the past week with no test performed reported in the past week.
In Sudurpashchim, 1 new case was reported in the past week. Since a peak in week 4, cases are in a decreasing trend. However, cases have increased in the past week compared to the previous week. There was no death reported in the past week, same as that in the previous week. The test positivity rate in Sudurpashchim remained stable at 0.0% in the past week with 1 test performed reported in the past week.

*Total reported in Health Emergency Operation Center (HEOC) Sitrep as of 15 May 2022, 140,261 but IMU reported 120,440

Notes:
1. The source for case data used in this update is from RT-PCR test positivity reported by laboratories from various locations across Nepal, as shared by HEOC Sitrep; and IMU/IHIMS.
2. Case data is screened and cleaned by our data team for double entry, wrong entry and manual errors such as cities name in place of districts, district name in place of province etc.
3. Whereas the test positivity rate is calculated based on the test positivity reported in Sitrep for RT-PCR which may or may not be scrutinized or cleaned the same way and mark the cases on location of the laboratories rather than their place of residence.
Figure 4: Distribution of RT-PCR positive COVID-19 cases by age and sex (N=974,167) (Data reported on 05 June 2022 up to 19:00:00)

Note: Core epidemiological variables under process for 5032 cases.

Overall, the sex-distribution remains skewed towards males. The incidence of cases is higher in the economically productive age group (15-54 years) for both males and females.
Table 2: Age Specific Case Fatality Ratio and Co-morbidity of Deaths in RT-PCR confirmed COVID-19 cases (N=979,199) (Data reported on 05 June 2022 up to 19:00:00)

Note: COVID-19 positive lab result is temporally associated with death; causal association under investigation.

\[
\text{Case Fatality ratio (CFR, in\%) } = \frac{\text{Number of deaths from disease}}{\text{Number of confirmed cases of disease}} \times 100
\]

A total of 11,952 deaths have been reported. Out of the total deaths, 7,838 (65.6%) were male and 4,114 (34.4%) were female. Amongst the deaths, 3,841 persons (32.1%) had at least one known comorbidity. The age specific case fatality ratio (CFR) progressively increases with age, ranging from 0.06% to 12.22%.
PREPAREDNESS AND RESPONSE

What are the Government of Nepal (GoN) & the Ministry of Health & Population (MoHP) doing?

- COVID-19 vaccination campaign is going simultaneously in all provinces of the country

What is the WHO Country Office for Nepal doing?

Laboratory Diagnosis

- A total of 57,15,414 RT-PCR tests were performed nationwide by 106 designated COVID-19 labs functional across the nation (as of 5 June 2022).
- Supported the National Public Health Laboratory (NPHL) in monitoring the quality standard of designated COVID-19 laboratories in the country through the National Quality Assurance Program (NQAP). A total of 3 designated COVID-19 laboratories participated in the NQAP this week. The result of all participating laboratories was 100% concordant.
- Technical support provided to NPHL in performing genome sequencing of 15 SARS-CoV-2 samples.

Technical Expertise and Training

- Continued routine work from the team of Technical Expertise and Training\(^2\)
- WHO supported National Health Training Center (NHTC) to conduct “Users Training on Biomedical Equipment” at Nepal Police Hospital. The training was conducted on 3 and 4 June 2022 and 16 (3 males and 13 females) health care workers were trained.
- WHO supported NHTC to conduct one-day Basic Life Support (BLS) training at Dhulikhel hospital. Four batches of training were conducted from 30 May to 2 June 2022, and 83 health care workers from different parts of the country received the training.
- WHO attended a meeting with National Health Training Center (NHTC) and Curative Service Division (CSD) officials on 01 June 2022, to discuss preparation of “Learning Resource Package of Acute Respiratory Distress Syndrome”. Technical Working Group (TWG) from the experts involved in the development of national guidelines was formed. The group includes representatives from critical care societies (doctors and nurses).

\(^2\) The routine works of the technical expertise and training team included technical support to the Ministry of Health and Population and its department for developing different guidelines/manuals, conducting health programs and conducting capacity building activities. In order to perform these activities, the team coordinates and discuss with relevant government authorities and partners for effective planning and conducting the various activities.
Operational Support and Logistics

- Continued routine work from the team of Operation Support and Logistics³
- The team facilitated to renovate the roof of Point of Entry (POE) Health Desk at the Rani PoE of Morang district on 30 May 2022.
- The team supported to handover the following items:
  - Physio equipment, medical items and Information Communication and Technology (ICT) equipment for rehabilitation clinic to Dhulikhel Hospital on 26 May 2022.
  - One set tablet for respiratory trial study for Nepal (oxygen study) to Godavari Alumni Association on 25 May 2022, provided by WHO Headquarter.
- Supported to conduct the following events:
  - National Technical Working Committee AMR meeting for finalization of NAP AMR costing and AMR-TrACSS Survey on 03 June 2022.
  - Supported to design and print t-shirts, caps and standees for World Food Safety Day.
- Supported to dispatch prefab- containers from Pathalaiya to Janakpur to be used for setting up a permanent PHEOC at Madhesh Province.

Risk Communication and Community Engagement

- Provided support to NHEICC in the content finalization, designing and printing of visibility items (Banner and standees) to mark World No Tobacco Day 2022.
- On the occasion of World No Tobacco Day, relevant IEC materials were shared on WCO Nepal social media platforms.
- WHO and MoHP press briefings on COVID-19 are being shared via Facebook and Twitter.
- The following documents were uploaded on ReliefWeb (link here):
  - Weekly COVID-19 EPI Dashboard, and
- IEC materials on the following topics were shared via WHO, Country Office for Nepal, social media:
  - Importance of primary health care and COVID-19,
  - Safety and efficacy of COVID-19 vaccines,
  - Importance of following public health measures even after COVID-19 vaccinations,

³ The routine works of the operation support and logistics team included technical support to the Management Division of the Department of Health Services for the forecasting, quantification, procurement, and distribution plan of COVID-19 commodities. The other routine activities included daily operational support to the WHO country office and seven provincial health emergency operation centers, including fleet and travel management and the procurement of required logistics and supplies.

- Continued support to the Health Coordination Division, Spokesperson of Ministry of Health and Population (MoHP) for the weekly National briefing. The key messages included in the MoHP briefing on 1 June 2022 are: COVID-19 cases and vaccination update, message on significance of adhering to public health and social measures, focus on booster dose. Similarly, information about transmission, symptoms and prevention from Monkey Pox; World No Tobacco Day was shared. The briefing also showcased a photo story about the 75th World Health Assembly and participation of Nepali Delegation in the event.
- Support in finalizing the script and recording of video message with honorable health minister about Nepal's plan and preparation of rolling out COVID-19 vaccine for the children aged 5 years to 11 years. Nepal will be running campaign in two phases to vaccinate around 2.9 million children in the target age group starting end of June 2022. The video message was disseminated via social media platforms of Ministry of Health and Population.

What are the health clusters partners doing?
- Continued routine work from the team of Partner Coordination and Donor Relation
- UNICEF and WHO are providing overall support for COVID-19 vaccination campaign in close coordination with health partners and donors.
- All members of the Health Cluster are supporting the COVID-19 vaccination campaign of Nepal.
- Health partners are continuing their technical, operational, and logistics support for COVID-19 responses to health-related offices and institutions throughout the country.
- Monsoon Preparedness and Response meeting was conducted with the health cluster partners on 2 June 2022 to coordinate effective response during the monsoon season.

---

4 The routine works include coordinating with all the divisions, units, centers of Ministry of Health and Population (MoHP) and Department of Health Services (DoHS), and the health partners for effective conduction of Health Cluster Coordination meeting. Furthermore, the works included the documentation and distribution of meeting minutes, health partner’s support updates in the 3Ws (Who, What, Where) and thematic mapping, updates of WHO’s support in the UNRCO 3W sheet, participate in multi-sectoral and emergency and disaster preparedness and response platforms and activities and the humanitarian country team operational meetings. Moreover, necessary support for effective coordination of Health Emergency Operation Centre (HEOC) with different stakeholders is provided.
