**HIGHLIGHTS**
(Data published in the MoHP Situation Report as of 22 January 2023 and same data published in EDCD Report as of 23 January 2023)

- Of the total RT-PCR confirmed COVID-19 cases, 98.8% (989,034) of cases have recovered, 0.01% (22) are active cases and 1.2% (12,020) are deaths.
- Among the new RT-PCR confirmed cases (25) reported this week, 28% (7) are from Kathmandu district. Majority of the new cases 36% (9) have been reported from Kathmandu Valley (Kathmandu, Lalitpur and Bhaktapur), Bagmati Province.

**COVID-19 vaccination coverage status (as of 17 January 2022)**

**NEPAL EPIDEMIOLOGICAL SITUATION**

- Since 9 May 2021, all 7 Provinces in the country are experiencing community transmission.
- Since the start of the COVID-19 pandemic, a total of 78.2% (782,819/1,001,076) of RT-PCR confirmed cases were reported from three provinces, namely - Province 1, Bagmati Province, and Lumbini Province. The Kathmandu Valley area (Kathmandu, Bhaktapur, Lalitpur) in Bagmati Province has substantially high case load with 44.1% of national total (441,708/1,001,076), and 81.4% of the provincial total (441,708/542,786).
- Province-wise, RT-PCR test positivity rate in Epi Week 03 ranged from 0.0% (Madhesh, Gandaki, Lumbini and Sudurpaschim Provinces) to 30.0% (Province 1), with a national positivity rate at 0.8%. Karnali Province did not report any RT-PCR test performed in the last week.
- Nepal reported a 14% decrease in the number of new RT-PCR confirmed cases (n=25) in Epi week 03 compared to that in the previous week. Of these total cases reported last week, 84% of the cases have been reported from Province 1, Bagmati, and Lumbini Province.
- Nepal did not report any death in Epi week 03, same as in the previous week.
National Influenza Surveillance

- National Influenza Center (NIC)-NPHL reported 21 diagnostic Influenza samples on Epi-week 3 (16-22 Jan 2023). Seven samples tested Influenza A/H3 positive and 1 sample tested Influenza B Victoria positive. None of the samples tested positive for SARS-CoV-2.
- NIC-NPHL received 15 samples from its sentinel sites i.e., Sukraraj Tropical and Infectious Disease Hospital (9 samples), TUTH (5 samples) and Kanti Children’s Hospital (1 sample) Influenza-SARS-CoV-2 testing. Five samples tested Influenza A/H3 Positive. None of the samples tested positive for SARS-CoV-2.
- Provincial Public Health Laboratories (PPHLs) reported testing of 85 samples for Influenza-SARS-CoV-2 using Multiplex kit on Epi-week 3 (16-22 Jan 2023). Four samples tested Influenza A/H3. A total of 267 samples have been tested by PPHLs till 22 January 2023.

From 2 January 2023 until 22 January 2023:

- A total of 58 samples have tested positive for Influenza (4 Influenza B, 44 Influenza A/H3 and 10 Influenza A(H1N1pdm09) from 458 samples (sentinel and non-sentinel samples including SARS-CoV-2 Negative SARI and ILI cases).
- Similarly, 2 samples tested positive for SARS-CoV-2 from 407 Influenza samples (Sentinel/non-sentinel ILI/SARI samples).\(^1\)

WHO SEAR countries: Number of COVID-19 confirmed cases and cumulative incidence rate (per 100,000). Link Here- https://worldhealthorg.shinyapps.io/covid/

---

\(^1\) These positive cases are included in the COVID-19 database
Figure 1: RT-PCR confirmed COVID-19 cases and average number of COVID-19 cases over the last seven days, by date of onset/sample/confirmation (N= 1001076)(Data reported on 22 January 2023 up to 19:00:00)

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020 (not shown here). Reference dates used in order of preference as available – Date onset/Date of sample collection/Date of confirmation. Clinical information presented here is collected on the day of sample collection.

At national level, the first wave of cases between July 2020 and February 2021 was followed by the second wave from the middle of March 2021. Since the middle of December 2021, a third wave of cases soared up exceeding the highest number of single day cases reported in the past surges towards the end of January 2022. Another wave of cases steadily soared up towards the middle of May 2022 following an overall declining trend since the middle of August 2022.

Figure 2: Cumulative case count of RT-PCR confirmed COVID-19 (N= 1001076)(Data reported on 22 January 2023 up to 19:00:00)

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020 (not shown here). Reference dates used in order of preference as available – Date onset/Date of sample collection/Date of confirmation.
The cumulative case incidence has been increasing in Nepal since the first case confirmed on 23 January 2020. Cases have been largely reported from Bagmati Province followed by Province 1 and Lumbini Province.

Figure 3A1: RT-PCR confirmed COVID-19 cases in Province 1: Trend of Cases, 7 days Rolling Average, Weekly Cases and Deaths and Test Positivity Rate (Data reported on 22 January 2023)

There were 12 new cases reported in the past week in Province 1. Cases have increased by 500% in the past week compared to that in the previous week. There was no death reported in the past week, same as in the previous week. The test positivity rate in Province 1 increased to 30.0% in the past week. A total of 30 tests were performed in the past week, 49% less than that in the previous week.
There were 2 new cases reported in the past week in Madhesh Province. Cases have increased in the past week compared to none in the previous week. There was no death reported in the past week, same as in the previous week. The test positivity rate in Madhesh Province retained at 0.0% in the past week. A total of 11 tests were performed in the past week, 65% less than that in the previous week.

Figure 3A3: RT-PCR confirmed COVID-19 cases in Bagmati Province: Trend of Cases, 7 days Rolling Average, Weekly Cases and Deaths and Test Positivity Rate (Data reported on 22 January 2023)
In Bagmati Province, 9 new cases were reported in the past week. Cases have decreased by 59% in the past week compared to that in the previous week. There was no death reported in the past week, 100% decrease compared to that in the previous week. The test positivity rate in Bagmati Province decreased to 0.6% in the past week. A total of 3196 tests were performed in the past week, 15% less than that in the previous week.

Figure 3A4: RT-PCR confirmed COVID-19 cases in Gandaki Province: Trend of Cases, 7 days Rolling Average, Weekly Cases and Deaths and Test Positivity Rate (Data reported on 22 January 2023)

In Gandaki Province, 2 new cases were reported in the past week, same as in the previous week. There was no death reported in the past week, same as in the previous week. The test positivity rate in Gandaki Province retained at 0.0% in the past week. A total of 37 tests were performed in the past week, 85% more than that in the previous week.
Situation Update #145- Corona virus Disease 2019 (COVID-19)  
WHO Country Office for Nepal  
Friday 27 January 2023

Figure 3A5: RT-PCR confirmed COVID-19 cases in Lumbini Province: Trend of Cases, 7 days Rolling Average, Weekly Cases and Deaths and Test Positivity Rate (Data reported on 22 January 2023)

Lumbini Province reported no new cases in the past week. Cases have decreased by 100% in the past week compared to that in the previous week. There was no death reported in the past week, same as in the previous week. The test positivity rate in Lumbini retained at 0.0% in the past week. A total of 11 tests were performed in the past week, 21% less than that in the previous week.

Figure 3A6: RT-PCR confirmed COVID-19 cases in Karnali Province: Trend of Cases, 7 days Rolling Average, Weekly Cases and Deaths and Test Positivity Rate (Data reported on 22 January 2023)
**Situation Update #145 - Corona virus Disease 2019 (COVID-19)**

**WHO Country Office for Nepal**

**Friday 27 January 2023**

In Karnali Province, no new case was reported in the past week. Cases have decreased by 100% in the past week compared to that in the previous week. There was no death reported in the past week, same as in the previous week. There was no test performed reported in the past week.

**Figure 3A7: RT-PCR confirmed COVID-19 cases in Sudurpaschim Province: Trend of Cases, 7 days Rolling Average, Weekly Cases and Deaths and Test Positivity Rate** (Data reported on 22 January 2023)

In Sudurpaschim Province, no new case was reported in the past week. Cases have decreased by 100% in the past week compared to that in the previous week. There was no death reported in the past week, same as in the previous week. The test positivity rate in Sudurpaschim was 0.0% in the past week. A total of 3 tests were performed in the past week, compared to none reported in the previous week.

*Total reported in Health Emergency Operation Center (HEOC) Sitrep as of 22 January 152219, IMU reported 129544

Notes:
1. The source for case data used in this update is from RT-PCR test positivity reported by laboratories from various locations across Nepal, as shared by HEOC Sitrep; and IMU/IHIMS.
2. Case data is screened and cleaned by our data team for double entry, wrong entry and manual errors such as cities name in place of districts, district name in place of province etc.
3. Whereas the test positivity rate is calculated based on the test positivity reported in Sitrep for RT-PCR which may or may not be scrutinized or cleaned the same way and mark the cases on location of the laboratories rather than their place of residence.
Overall, the sex-distribution remains skewed towards males. The incidence of cases is higher in the economically productive age group (15-54 years) for both males and females.

**Table 2: Age Specific Case Fatality Ratio and Co-morbidity of Deaths in RT-PCR confirmed COVID-19 cases (N= 1001076)** (Data reported on 22 January 2023 up to 19:00:00)

\[
\text{Case Fatality ratio (CFR, in\%) = \frac{\text{Number of deaths from disease}}{\text{Number of confirmed cases of disease}} \times 100}
\]

COVID-19 positive lab result is temporally associated with death; causal association under investigation.
A total of 12,020 deaths have been reported. Out of the total deaths, 7,881 (65.6%) were male and 4,139 (34.4%) were female. Amongst the deaths, 3,902 persons (32.5%) had at least one known comorbidity. The age specific case fatality ratio (CFR) progressively increases with age, ranging from 0.06% to 11.8%.

**PREPAREDNESS AND RESPONSE**

What are the Government of Nepal (GoN) & the Ministry of Health & Population (MoHP) doing?

- From 3 November 2022 onwards, the Government of Nepal has started administering second dose COVID-19 booster vaccination for people aged 55 and above and the vulnerable population (immune-deficiency/chronic patients, pregnant women, and health workers) group.

What is the WHO Country Office for Nepal doing?

*Laboratory Diagnosis*

- WHO Nepal has been providing continuous technical support to the National Public Health Laboratory (NPHL).

*Technical Expertise and Training*

- Continued routine work from the team of Technical Expertise and Training.²

*Operational Support and Logistics*

- Continued routine work from the team of Operation Support and Logistics.³

*Risk Communication and Community Engagement*

- The news of the visit of the Finnish MPs delegation to the HEOC, established under MOHP, with the support of WHO, Country Office for Nepal, was shared via Twitter (link [here](#)). The delegation had an interactive exchange with the Chief of HEOC and appreciated the important role of HEOC to enhance coordination during public health emergencies and disasters.
- The new episode of *Paanch Maa Bigyaan*, on respiratory diseases in children, was shared via SoundCloud (link [here](#)), Facebook (link [here](#)), and Twitter (link [here](#)). A promotional poster was also shared via Facebook (link [here](#)), Twitter (link [here](#)), and Instagram (link [here](#)).
- IEC materials on the following topics were shared via social media:
  1. 4 things governments should do to protect people from COVID-19,

---

² The routine works of the technical expertise and training team included technical support to the Ministry of Health and Population and its department for developing different guidelines/manuals, conducting health programs, and conducting capacity building activities. To perform these activities, the team coordinates and discuss with relevant government authorities and partners for effective planning and conducting the various activities.

³ The routine works of the operation support and logistics team included technical support to the Management Division of the Department of Health Services for the forecasting, quantification, procurement, and distribution plan of COVID-19 commodities. The other routine activities included daily operational support to the WHO country office and seven provincial health emergency operation centers, including fleet and travel management and the procurement of required logistics and supplies.
II. How to stay safe from flu during the winter,
III. Physical activity and COVID-19,
IV. Importance of vaccines,
V. Preventive measures against COVID-19,
VI. WHO's 75th anniversary.

- The Weekly COVID-19 EPI Dashboard was uploaded on ReliefWeb (link here) and WHO, Country Office for Nepal, website (link here).
- The Weekly WHO Nepal COVID-19 Situation Update was uploaded on ReliefWeb (link here) and WHO, Country Office for Nepal, website (link here).
- The Focused COVID-19 and Health Media Monitoring was uploaded on ReliefWeb (link here).
- Episode 87 of Science in 5 (Is measles making a comeback?) was translated, dubbed, and published via the following links:
  I. Nepali: Facebook link; Twitter link; YouTube link; OneDrive link; Instagram link
  II. Maithili: Facebook link; YouTube link; OneDrive link
- Continued support to the Joint Spokesperson, Chief of Health Coordination Division, in coordination with other pillars to prepare content for the weekly media briefing. This week's briefing focused on updates on COVID-19 and measles outbreak in Banke district.

What are the health clusters partners doing?
- Continued routine work from the team of Partner Coordination and Donor Relation
- UNICEF and WHO are providing overall support for COVID-19 vaccination campaign in close coordination with health partners and donors.
- All members of the Health Cluster are supporting the COVID-19 vaccination campaign of Nepal.
- Health partners are continuing their technical, operational, and logistics support for COVID-19 responses to health-related offices and institutions throughout the country.
- COVID-19 consultation is being provided continuously by specialist teams through tele-medicine services.
- Provided technical support during the visit of the delegation of members of Finnish Parliament to the Health Emergency Operation Center (HEOC) at MoHP.

WHO’s STRATEGIC OBJECTIVES FOR COVID-19 RESPONSE- link here
RECOMMENDATION AND ADVICE FOR THE PUBLIC
- Protect yourself
- Questions and answers
- Travel advice
- EPI-WIN: tailored information for individuals, organizations and communities

---

4 The routine works include coordinating with all the divisions, units, centers of Ministry of Health and Population (MoHP) and Department of Health Services (DoHS), and the health partners for effective conduction of Health Cluster Coordination meeting. Furthermore, the works included the documentation and distribution of meeting minutes, health partner’s support updates in the 3Ws (Who, What, Where) and thematic mapping, updates of WHO’s support in the UNRCO 3W sheet, participate in multi-sectoral and emergency and disaster preparedness and response platforms and activities and the humanitarian country team operational meetings. Moreover, necessary support for effective coordination of Health Emergency Operation Centre (HEOC) with different stakeholders is provided.
