ICN Call to Action

COVID-19

- 1** Urgently prioritise ready access to sufficient quantity of high-quality and appropriate personal protective equipment (PPE) for nurses and other healthcare workers
- 2** Ensure all nurses have appropriate evidence-based infection prevention and control training and the latest COVID-19-specific guidance and training
- 3** Protect the health and wellbeing of nurses and other healthcare workers
- 4** Rapidly implement/scale-up comprehensive surveillance systems to track and investigate healthcare worker infection
- 5** Ensure the financial protection and compensation of nurses
- 6** Provide a safe and effective Registration and Regulatory response when rapidly expanding the nursing workforce
- 7** Ensure a safe and effective deployment of nursing staff to areas of high demand and high complexity as the need arises
- 8** Encourage, develop and support new models of care and innovation
- 9** Demonstrate public support and recognise the value of nurses to society
- 10** Capitalise on nursing leadership
- 11** Develop and implement a comprehensive, coordinated COVID-19 public health strategy with active engagement of nurses
- 12** Learn from the COVID-19 pandemic to be prepared for the future

ICN's analysis

- HCW infection rates vary significant ranging from **1% to 30%**.
- On average **7%** of all COVID-19 cases are among HCWs .
- Globally there could be in excess of **500,000** HCWs infections.
- Nurses are commonly the occupational group with the highest number of infections.

Nurses take legal action against Sánchez & Illa

2020-04-23 16:14:00 Majorca-International By Majorca Daily Bulletin reporter

The General Nursing Council, or CGE has filed a complaint with the Supreme Court against the Spanish Prime Minister, Pedro Sánchez, and the Health Minister, Salvador Illa, for a crime against the safety of workers in critical health due to coronavirus.

The CGE said in a statement on Thursday that the complaint is in addition to other, different criminal proceedings filed by several Autonomous Councils and Provincial Schools of Nursing throughout Spain against the management of the different provincial and Autonomous Health Authorities.

Their judicial action originated from an agreement adopted weeks ago by the Executive Commission of the General Council of Nursing, because of the lack of safety equipment for Healthcare Professionals which resulted in wave of infections and deaths.

Healthcare workers demand a public inquiry into hundreds of staff deaths and PPE failings

Despite a petition receiving over 120,000 signatures supporting a public inquiry, there has been no formal response from the government.

As of 3 June 2020, at least **600** nurses have died from COVID-19.

Notably high numbers in Brazil, the US, Mexico, and the UK

With 500,000 estimated HCW infections, the number of HCW deaths will be in the 000's. Higher incidence amongst BAME staff.

There is no systematic or standardised reporting of HCW infections, deaths or COVID19 related assaults and even suspected non-cooperation with reporting i.e. NursingNotes UK
