On the Food Safety side,

- a special Joint FAO/WHO Expert Meeting on the pre- and post-harvest control of Campylobacter spp. in poultry meat was held in February, and

several publications were finalized in the period January to March:

- Risk assessment of food allergens: part 2: review and establish threshold levels in foods for the priority allergens: meeting report (who.int)
- Prevention and control of microbiological hazards in fresh fruits and vegetables: part 3: sprout: meeting report (who.int)
- Safety and quality of water use and reuse in the production and processing of dairy products: meeting report (who.int)
- Report 2022: pesticide residues in food: Joint FAO/WHO Meeting on Pesticide Residues
- Safety and quality of water used in the production and processing of fish and fishery products: meeting report (who.int)
- Food safety aspects of cell-based food (who.int)
- Evaluation of certain contaminants in food: ninety-third report of the Joint FAO/WHO Expert Committee on Food Additives
Start preparing for:

World Food Safety Day 7 June 2023 (who.int)

A guide to World Food Safety Day 2023: food standards save lives (who.int)

Interested in contributing?

- Call for experts on the microbiological risk assessment of non-typhoidal Salmonella spp. and Campylobacter spp. in poultry meat (who.int) - Deadline 30 April
- Online public consultation: draft guideline on use of low-sodium salt substitutes (who.int) - Deadline 30 April
