

To Err is Human: Patients' stories from the heart

Tuesday, 29 November 2022

13:30-15:00 CET

[Registration link](#)

On 29 November 1999, the Institute of Medicine report **“To Err is Human: Building a Safer Health System”** brought the issues of medical errors and patient harm in health care to the forefront of health policy agenda, and catalyzed the global movement around patient safety, with a number of subsequent achievements at the global, regional and country levels.

Patient Safety Flagship Unit, WHO headquarters, Geneva is organizing a webinar to mark the anniversary of “To Err is Human” report. During the webinar, you will have an opportunity to view a Patient Safety Documentary “To Err is Human” as well as to hear from patients, families and their representatives about real experiences in health care and what can be done to eliminate avoidable harm in health care.
