BIOGRAPHY
Dr Sheena Sullivan

Associate Professor Sheena Sullivan is Head of Epidemiology for the WHO Collaborating Centre for Reference and Research on Influenza in Melbourne and Associate Professor in the Department of Infectious Diseases (DoID), University of Melbourne. Her work focusses on vaccine effectiveness and the validity of study designs used to estimate it. She works closely with National and Regional partners, including the WHO and US CDC, to use surveillance data to estimate the burden of influenza and other viral respiratory diseases and the impact of influenza vaccines. She leads or collaborates on several sero-epidemiological cohort studies to characterise responses to influenza infection and vaccination.
